Bp. Hall. Select Thoughts, § 22.

Nothing, is that, of which every thing can truly be denied,
and *no thing* can be truly affirmed. So that the idea of

is a contradiction in terms.

sidered as having not only a negative but a kind of positive
signification; as I need not fear thieves, I have *nothing*.
and *nothing* is a very powerful protector. In the first part
of the sentence it is taken negatively; in the second it is
taken positively, as an agent.—*Johnson. Life of Rochester.*

and *notion*. Locke and Bolingbroke both attempt
it, but with no effect. *Idea* might be used as a
simple and specific term to express our sensations
numerically separate; *notion* as a general and
complex term for a *collection of ideas*: and thus
we could not (and now should not) say, "I have
an *idea* of a man, or of an animal; but we might
say with propriety, I have a *notion* of a man, or of
an animal." *Notion* is now used indiscriminately
as equivalent to—

Idea, perception, conception, opinion, thought;
and was used (as in the quotation from Shake-
speare and Milton) for knowledge, power of
knowing or understanding.

The Stoicks are of opinion and say, that when a man is
engendered he hath the principal part of his soule which is

Milton. Paradise Lost, b. vii.

Thou hast not ear, nor soul to apprehend
The sublime *notion*, and high mystery,
That must be utter'd to unfold the sage
And serious doctrine of virginity. *Id. Comus.*

This hath muddled the fountain certainly with *notional*
and ethnick admixtions; and platted the head of evangelical
truth, as the Jews did its author's, with a crown of thornes.
Glanvill. Vanity of Dogmatizing, c. 17.

I aimed at the advance of science by discrediting empty
and talkative *notionality*.—*Id. Ib.*

Content not yourselves with some part of it, that you read
the gospel, or new Testament, but neglect the old as is the
practice of some flush *notionist*.
Bp. Hopkins. Exposition of the Lord's Prayer.

For it [the mind] being once furnished with simple ideas,
it can put them together in several compositions, and so
make variety of complex ideas, without examining whether
they exist so together in nature, and hence I think it is that
these ideas are called *notions*, as they had their original and
constant existence more in the thoughts of men than in the
reality of things.—*Locke. Hum. Underst. b. ii. c. 22.*

The whole rational nature of man consists of two faculties,
understanding and will, whether really or *notionally* distinct,
I shall not dispute.—*Norris. Miscellanies.*

I distinguish here, between ideas and *notions*: for it
seems, to me, that as we compound simple into complex
ideas, so the compositions we make of simple and complex
ideas may be called, more properly, and with less confusion
and ambiguity, *notions*.

South, vol. vi. Ser. 11.

He that pursues his vice *notoriously* has not so much re-

an ordinary reason.—*Id. vol. viii. Ser. 11.*

We now see what a multitude of pagan testimonies may
be produced for all those remarkable passages, which might
have been expected from them; and indeed of several, that,
I believe, do more than answer your expectation, as they
were not subjects in their own nature so exposed to *noto-
riety*.—*Addison. Of the Christian Religion, s. 2.*

It is in the future confirmation or contradiction of the account; in its permanency or its disappearance; its dying away into silence or its increasing in *notoriety*; its being followed up by subsequent accounts, and being repeated in different and independent accounts, that solid truth is distinguished from fugitive lies.—*Paley. Those instituted words which men do agree upon for the

NOUSLE, v. Skinner writes *Nuzzle*, corrupted from *Nestle*, (Lye.) *Nuzzle*; *nasum aliquo indere*, from the Dut. *Neuselen*, to search after with the nose or snout. *Nosel*, the dim. of *Nose*. Steevens, on *Pericles*, would read *Nursle*. A fondling, he observes, is still a *nursling*. To *nouzele*, or, as it is now written, *nuzzle*, is to go with the nose down like a hog. The application of the verbs to *nestle*, to *nursle*, and to *nuzzle*, border so close upon each other that it is difficult in some instances to discriminate the source of corruption. An infant may be said to *nestle*, to *nursle*, or to *nuzzle*, in the breast or bosom of its nurse or mother; and the general application seems to be—

To creep closely or snugly into, (as a child with its nose nestles into the breast of its nurse,) to sink into, to lie closely or fondly, to cling fondly to, to hang or dwell fondly or doatingly upon; to fondle, to doat.

NUNCHION. Browne's manner of writing the word (*noonshun*) has suggested that it was the name of a meal or refreshment taken when labourers retreated to *shun* the heat of noon; but Cotgrave (in vv. *Reciné, Ressie*) and Sherwood write *nuncion* or *nuncheon*, and speak of it as an afternoon's repast: the application, however, of noon in earlier times was to a period of the day which was subsequently called *afternoon*; i. e. after mid-day or meridian; but still during even an increase of heat. *Cion*, or *chion* seems an easy corruption of *shun* in speech, and the mode of writing may have been adopted in conformity to our common termination in *cion*, *sion*, or *tion*. This repast is now more commonly called *lunchion*, (qv.) See also NOON, NOONING, and especially the quotation from Milton, b. v.

It is probable, that at first, *oaths* were only used upon
 weighty and momentous occasions, yet in process of time
 they came to be applied to every trivial matter in common
 discourse.—*Potter. Antiquities of Greece*, b. i. c. 6.

But whatever be the form of an *oath*, the signification is
 the same. It is "the calling upon God to witness, i. e. to
 take notice of what we say," and it is "invoking his ven-
 geance, or renouncing his favour, if what we say be false, or
 what we promise be not performed."
Paley. Moral Philosophy, b. iii. c. 16.

OB, prep. Vossius derives the Lat. prep. *Ob*
 from Gr. *Οπη*, or *απο*, or *επι*, and Butler decides
 for the last : and observes that it sometimes merely
 increases the signification, as *dorm-ire*, to sleep,
ob-dormire, to sleep upon sleep; i. e. to sleep
 soundly.

OB-AMBULATION. Lat. *Obambulatio*, from
ob-ambulare, to walk about.

A walking about, a continued or repeated
 walking.

Impute all these *obambulations* and night walks to the
 quick and fiery atoms, which did abound in our Don.
Gayton. Don Quixote, (1654.) p. 217.

OB-DORMITION. Lat. *Obdorm-ire*, to sleep

Bp. Hall. Contemplations, b. iv.

OB-DUCE, v. } Lat. *Ob-ducere*, to draw
 OBDUCTED. } over; *ob*, over, and *ducere*, to

To draw over, to cover; to conceal.

No bird, or terrestrial animal exhibits its face in the
 native colour of its skin but man; all others are covered

 cutis, as in elephants and some sort of Indian dogs.

 manner: I will suffer Pharao to be *indurated*, but I will
 not do it, but my easyness, my softness, whereby that I shall
 suffer him, shall bryng other men to repentance, but Pharo
 shall it make more obstinate in malice.

What shal we say then to those *obdured* hearts, which are

Leo. A good conclusion,—
 The *obduracie* of this rascal makes me tender.
Beaum. & Fletch. Custom of the Country, Act iv. sc. 1.

But what *obdurate* heart was ever so perverse,
 Whom yet a lover's plaints with patience could not pierce?
Drayton. Poly-Olbion, s. 18.

This reason of his was grounded upon the *obdurateness* of
 men's hearts, which would think that nothing concerned
 them, but what was framed against the individual offender.
Hammond. Works, vol. iv. p. 687.

To what an height of *obduration* will sinne lead a man,
 and of all sins, incredulity?

Bp. Hall. Cont. Of the Plagues of Egypt.

Yea, to such a height of atheous boldness and *obduration*
 are the ruffians of our time grown, that they boast of it as
 their greatest glory, to fear nothing; neither God nor devil.
Id. Ser. 1 Peter, i. 17.

If we be less worthy than thy first messengers, yet what
 excuse is this to the besotted world, that through *obdured-*
ness and infidelity it will needs perish.
Id. Ser. Acts, ii. 37, 38, 40.

 the time of death.—*Id.* vol. ix. Ser. 7.

O'BELISK. Fr. *Obélisque*; It. and Sp. *Obe-*
lisco; Lat. *Obeliscus*; Gr. *ὀβελίσκος*, from *ὀβελος*,
 and that from *βελος*, *sagitta*, an arrow. The word
 is sufficiently explained below, and is also applied
 to a mark or sign, used in printing, shaped like a
 dagger.

The Kings of Egypt in times past made of this stone
 [Syrenites] certain long *beames* which they called *obeliskes*,
 and consecrated them unto the sun, whome they honoured
 as a God; and indeed some resemblance they carrie of sunne
beames. . . The first that ever began to erect these *obeliskes*
 was Mitres, king of Egypt, who held his royall seat and
 court in Heliopolis, the citie of the sunne.
Holland. Plinie, b. xxxvi. c. 8.

Now an *obeliske* is a most hard and rough stone, broad
 beneath, and sharpe above, rising by little and little to a
 mightie height, and because it might resemble a ray or
 sunne-beame, waxing smaller and smaller, it is with foure
 faces brought up, to a narrow top, and the same is smoothed
 also artificially by the workemans hand.
Id. Ammianus, b. xvii. c. 3.

OBE/SE. } Fr. *Obésité*; Lat. *Obesitas*, from
 OBE/SITY. } *obesus*, pinguis, crassus, fat, gross;
ob, and *esus*, from *ed-ere*, to eat. Vossius suggests
 that it may be so used because—*ad edendum aptum*,
edque vescis animantibus propriè conveniens.
 There seems little room for doubt; *ob* (aug.), and
edere, to eat, to feed; and *ob-esus*, consequentially,
 fed much, fed highly; and hence,—

Excessively fed or fat; fat to a diseased ex-
 cess; morbidly fat or fleshy. The word is princi-
 pally used by medical writers.

The author's counsel runs upon his corpulency, just as
 one said of an over-*obese* priest that he was an Arminian;

OBLA'TE, Lat. Oblatus, as applied to figure, is contradistinguished from *prolate*, (*pro-ferre, prolatum*), drawn out, extended, beyond, (sc. a perfect sphere or spheroid;) and is applied, when such figure is opposed or stopped in its spherical formation; and, consequently, compressed, flattened, (sc.) at two opposite extremities; i.e. at the poles.

The equilibrium that was supposed to be amongst the parts will not, therefore, now subsist in a spherical figure, but will be destroyed by the inequality of their gravitation, till the water rise at the equator and sink at the poles, so as, by a greater height at the equator, to compensate the greater gravity at the poles; and till, by assuming an intermediate height in the intermediate places, the whole earth become of an oblate spheroidal form, whose diameter at the equator will be the greatest, and the axis the least, of all the lines that can pass through the center.

I will not resist, therefore, whatever it is, either of divine

their love and affections, what thing in the world is there
that is likely to do it?—*Sharp, vol. i. Ser. 2.*

A man is said to be obliged, "when he is urged by a
violent motive resulting from the command of another."

The various duties which have now been considered, all
agree with each other in one common quality, that of being
obligatory on rational and voluntary agents; and they are
all enjoined by the same authority,—the authority of con-
science.—*Stewart. Outlines of Moral Philosophy.*

And if the condition be possible at the time of making it,
and afterwards becomes impossible by the act of God, the
act of law, or the act of the obligee himself, there the penalty
of the obligation is saved; for no prudence or foresight of
the obliger could guard against such a contingency.

For first when the sunne approacheth unto them with his beames, they be hidden and no more seene: likewise, after his departure they shew themselves againe: and as the one, me thinkes, might have been more aptly called an apparition then a rising, so we should have framed our tongue in common speech to have termed the other *occultation*, rather than setting.—Holland. *Plinie*, b. xviii. c. 20.

Drunken men are taken with a plain defect, or destitution in voluntary motion, they reel; they tremble, they cannot stand, nor speak strongly. The cause is, for that the spirits of the wine oppress the spirits animal, and occupy part of the place, where they are; and so make them weak to move.

Dryden. *Britannia Rediviva*.

From Chaucer I was led to think on Boccace, who was not only his contemporary, but also pursu'd the same studies; wrote novels in prose, and many works in verse, particularly is said to have invented the *octave* rhyme or stanza of eight lines.—Id. *Preface to Fables*.

It was an *octavo* pocket-book, and appeared to be an exact copy of Rubens's album which he used in his travels; the drawings and even the hand-writing and different inks being exactly imitated.

OCTOBER. Fr. *Octobre*; It. *Ottobre*; Sp. *Octubre*; Lat. *October*. Vossius thinks *ber* a mere syllabic production of the voice: others that it is from *imber*, because the rains are frequent in the months whose names end with this syllable.

In shorter course draweth the dayes of December, than in the moneth of June; the springes of May faden and folowen in *Octobre*.—Chaucer. *The Testament of Loue*, b. ii.

O'CTONARY. Fr. *Octonaire*; It. *Ottônario*; Lat. *Octonarius*.
 Pertaining to, consisting of eight.

Which number [eight] being the first cube, is a fit hieroglyphick of the stability of that covenant made with the Jews in circumcision; and the Pythagoreans call the *octonary* *ασφαλεια*, which signifies that security which is by covenant.—More. *Def. of the Phil. Cabbala*, App. c. 2.

OCTONOCULAR. Having eight eyes, (*oculos*, see **OCULAR**.)

So that as most animals are *binocular*, spiders for the most part *octonocular*, and some (as Mr. Willoughby thought, *senocular*, so fleas, &c.) are *multocular*, having as many eyes as there are perforations in their corneæ.

OCTOSYLLABLE. Fr. *Octosyllable*. Consisting of eight syllables.

60. Though I call this the *octosyllable* metre from what I apprehended to have been its original form, it often consists of nine and sometimes of ten syllables; but the eighth is always the last accented syllable.

Of or pertaining to the eye, evident or manifest to the eye or sight; evident.

Il name a signe, shall force beleefe from you:

Brown. *Vulgar Errors*, b. vii. c. 15.

Sir. The subject we talk of is the eye of England; and if there be a speck or two in the eye, we endeavour to take them off; but he were a strange *oculist* who would pull out the eye.—Bacon. *Apophthegms*.

For as Thomas was an *ocular* witness of Christ's death and burial, so were the other disciples of his resurrection; having actually seen him after he was risen.

It may not therefore be useless to relate many circumstances, which were observable upon a late cure done upon a young gentleman who was born blind, and on the 29th of June last [1709] receiv'd his sight at the age of twenty years, by the operation of an *oculist*.—Tatler, No. 55.

ODDS. } quid *deest* ad numerum complendum.

Junius thinks *odd* cut off (*abscissum*) from the Eng. *added*; and Lye—that we owe the word to the Sw. *Udda*. Tooke asserts it to be the past part. *owed*, *ow'd*. Thus when we are counting by couples or by pairs, we say—one pair, two pairs, &c. and one *owed*, *ow'd*, to make up another pair, (and this coincides with the interpretations of Ihre and Skinner.) It has the same meaning (he adds) when we say—an *odd* man, or an *odd* action; it still relates to *pairing*; and we mean—without a fellow, *unmatched*, not such another, one *owed* to make up a couple. He might have noticed the equivalent expressions.—a singular man, a singular action. In numbers it is used when there is,—

One wanting to make the number even, or divisible into two equal numbers. Generally,—

Singular, unmatched, unequalled, not having its like; unlikely; uncommon, unusual, extraordinary.

Odds,—inequality, either for or against; unevenness, disparity, disagreement, dissension.

Oddity is a common word.

But Epicurus, a little ashamed of this, as that which must needs look *oddy* and ridiculously, and seeming more cautious and castigate, pretends to correct the extravagancy of this phancy.—Cudworth. *Intellect. System*, p. 673.

Milton. *Ode. Christ's Nativity*.

There is nothing more frequent among us than a sort of poems entitled *Pindaric Odes*; pretending to be written in imitation of the manner and style of Pindar, and yet I do not know that there is to this day extant, in our language, one *ode* contrived after his model.

Congreve. *A Discourse on the Pindaric Ode*.

Music and Poetry are coeval, and were, originally, always joyned together. But after their separation took place, after bards had begun to make verse compositions, which were to be recited or read, not to be sung, such poems as were designed to be still joined with music or song, were, by way of distinction, called *odes*.—Blair, vol. iii. O'DOUR. } Fr. *Odeur*; It. *Odore*; Sp. *Olor*; Lat. *Odor*. Vossius thinks the Lat. *Oleo*, to smell, was originally written *odeo*; and Scheidius has no doubt that *odor* was so used, —ab *acrimonia odoris*, nares quasi *pungentis*; and thus refers it to the same source as the Lat. *Odi*. (See *Odious*; and *Lenep*.)

Odour being thus equivalent to our vulgar usage of the word *stink*.

So early as about the close of the sixth century, Gregory the first, or the great, as he is usually called, the most reverend, and in some respects not undeservedly so, of all the Roman Pontiffs, in a famous dispute with the Bishop of Constantinople, who had taken to himself the title of *æcumenical*, or universal Bishop, objects to him, the arrogance and presumption of this claim, and treats him, on that account, as the forerunner, at least, of Antichrist.

OF. Goth. *Af*; A. S. *Of*; Dut. *Af*. Skinner derives from the Lat. *Ab*, Gr. *Απο*. Junius, —from *Απο, αφ'*. Tooke says, "I imagine that *of* (in the Goth. and A. S. *Af*) is a fragment of the Goth. and A. S. *Afara*, *posteritas*, *afora*, *proles*; that it is a noun substantive, and means always—consequence, offspring, successor, follower, &c." This presumes that the composite noun *Af-ar-a*, was in use before *Af* was used prepositively. He further observes, (p. 393, note,) "The Dutch are supposed to use *van* in two meanings; because it supplies indifferently the places both of our *of* and *from*. Notwithstanding which, *van* has always one and the same single meaning, viz. *beginning*. And its use both for *of* and *from* is to be explained by its different *apposition*. When it supplies the place of *from*, *van* is put in apposition to the same term to which *from* is put in apposition. But when it supplies the place of *of*, it is *not* put in apposition to the same term to which *of* is put in apposition, but to its *correlative*. And between two *correlative* terms, it is totally indifferent to the meaning which of the two correlations is expressed."

excellency in God.—*More. Antidote against Idolatry*, c. 2.

This omnipresence, or *omnipercipient* terrestrial, is one

But God uses not to proceed according to the rule of an
absolute *omnipotency*, but according to the oeconomie of his
most holy, most wise, most just decrees.
Bp. Hall. Sermon at Westminster, April 5, 1628.

The particulars not included in the true notion even of
omnipotence itself, I have shown, are, whatever things are
contradictory absolutely in their own nature; whatever
things are naturally evil and imply weakness or imperfection
in the Being itself to whom the power of doing them is
ascribed; and whatever things are morally evil and imply
injustice or unrighteousness towards others.

More. Antidote against Atheism, App. c. 3.

From the consideration of God's being *omnipresent*, it
follows that his power (as well as knowledge) is unlimited;
to be every where relied on by good men, and to be feared
by bad.—*Clarke*, vol. i. Ser. 8.

This attribute of *omnipresence*, as 'tis constantly ascribed
to God in scripture, so is it in reason likewise so plain and
obvious, that the generality of moral writers even among
the heathens themselves, have not been wanting to assert it
clearly and without hesitation.—*Id. Ib.*

Men cannot persuade themselves that *omnipotence*, *omni-
science*, and *omnipresence*, should ever be wrapt in swaddling
clothes, and abased to the homely usages of a stable and a
manger.—*South*, vol. iii. Ser. 8.

But his *omnipresent* filling all things being an insepara-

and was not then at length to be conferred on him.

What then is this union of the members of Christ here on earth, but a spiritual *oneness* arising from an happy conspiracy of their thoughts and affections.

Bp. Hall. *Christ Mystical*, s. 20

From the idea of God thus declared, it evidently appears that there can be but *one* such being, and that *Monowis*, unity, *oneliness* or singularity is essential to it; forasmuch as there cannot possibly be more than *one* Supreme, more than *one* omnipotent or infinitely Powerful Being, and more than *one* cause of all things besides itself.

Cudworth. *Intellectual System*, p. 207.

Which yet was no impertinent digression neither, it removing the grand objection against the naturality of the idea of God, as including *oneliness* in it, as also preparing a way for that defence of Christianity, designed by us against atheists.—Id. *Id.* p. 633.

ONEIROCRITICK, n. } Fr. *Onirocrite*, *oni-*
ONEIROCRITICAL. } *rocritique*; Lat. of
the Lower Ages, *Onirocrites*; Gr. *ὄνειρος-κριτικός*;
oneiros, a dream, and *κριτικός*, one who can discern,
understand, interpret.

"An interpreter of dreams," as Addison explains.

Beside Hippocrates hath spoke so little and the *oneiro-*
critical masters have left such frigid interpretations from
plants, that there is little encouragement to dream of para-
dise itself.—Brown. *Cyrus' Garden*, c. 5.

After having surveyed very attentively all kinds of ranks
and professions, I do not find in any quarter of the town an
oneirocritick, or in plain English, an interpreter of dreams.
Spectator, No. 505.

The *oneirocritics* borrowed their art of deciphering dreams
from hieroglyphic symbols: but hieroglyphic symbols were
the mysterious vehicle of the civil science and of the theology
of the Egyptians. Now *oneirocritic* or the art of interpreting
dreams was practised in the time of Joseph.

Warburton. *Divine Legation*, b. vi. s. 6.

O'NEROUS. Fr. *Onéreux*; Lat. *Onerosus*,
from *onus*, a load or burthen; which Lennep de-
rives from *ονω*, *tollo*, et per metonymiam, sublatum
gero. *Onω*, or *ονημι*, is usually rendered *prosum*,
utilitatem fero, or *affero*.

Burthensome, heavy, weighty.

Therefore he spareth, it may well been,
His poore estate for to susteen.—Chaucer. *R. of the R.*

O'NION. Fr. *Oignon*; Lat. *Unio*,—a bulbi
unitate nomen habens,—taking its name from the
oneness of the bulb, (Martinius.)

As for *onions*, I cannot find that there bee any of them
grow wild. Those which are sown in gardens, I am sure,
will with their smell only cause the eyes to shed tears, and
by that means clarify the sight: but if they be annointed
with the juice, they will munde the better.

Holland. *Plinie*, b. xx. c. 5.

ONLE/SS. So *unless* was anciently written, of
which a large collection of examples may be
seen in *Tooke*, (i. 162, et seq.) He considers it to
be *onles*, the imperative of the A. S. verb *Onlesan*,
to dismiss; and to mean *dimitte*, sive *dismisso*;
dismiss this, or *this* being *dismissed*. Skinner also
refers it (rather) to this A. S. verb; but without
fixing upon the particular part. See **LESS** and
UNLESS.

His aduersaries thought that he shulde neuer haue had
such a crosse laide on him *onless* then he had also outwardly

Bible, 1551. *Job*, c. 9. Note.

They thynke that *onlesse* one man's life be payde for the
lyfe of another, the wrath of Gods immortall cannot be

O'NOMANCY. } Fr. *Onomantie*; Gr. *ὀνομα-*
ONOMA'NTICAL. } a name, and *μαντεία*, *μαντευ-*
εσθαι, to foretell, to predict.

Prediction, or divination by names.

Such like curious observations bred the superstitious
kinde of diuination called *onomantia*, condemned by the
last generall counsell, by which the Pythagoreans iudged the
even number of vowels in names to signifie imperfections in
the left sides of men, and the odde number in the right.

Camden. *Remaines*. Names.

By this Theodatus, king of the Gothes, when he was cu-
rious to know the success of the warres against the Romans,
an *Onomanticall* or name-wisard Jew willed him to shut vp

O'NSET, i. e. a *set on*, assault, attack; also,

—"a dwelling-house and out-buildings" are so
called:—perhaps the out-buildings to a dwelling-
house.

They gave an *onset* sodeinly vppon Amyntas, that was Da-

And to this brave duke a fresh *onset* gave.

Drayton. *The Battle of Agincourt*.

O'NSLAUGHT. A. S. *On*, *sle-an*, *on-slag-an*,

SLAUGHT.

An attack, an assault:—(a *slaughterous* assault.)

Then called a council, which was best,
By siege or *onslaught*, to invest
The enemy: and 'twas agreed
By storm and *onslaught* to proceed.—Hudibras, pt. i. c. 3.

ONTOLOGY. Gr. *ὄντα*, accusative plural of
ὄν, being, and *λογος*, discourse. See the quotation
from Watts.

Ontology is a discourse of *being* in general, and the various
and most universal modes or affections, as well as the
several kinds or divisions of it. The word *being* here in-
cludes not only whatsoever actually is, but whatsoever can
be.—Watts. *On Ontology*, c. 1.

When these two sciences had thus been set in opposition
to one another, the comparison between them naturally gave
birth to a third, to what was called *ontology*, or the science
which treated of the qualities and attributes which were
common to both the subjects of the other two sciences.

Smith. *Wealth of Nations*, b. v. c. 1.

O'NYX. Fr. *Onyche*; It. *Onice*; Sp. *Onyche*;
Lat. *Onyx*; Gr. *ὄνυξ*, *unguis*; a corneo *unguis*
candore. "Sudines saith, that the precious stone
onyx hath a white in it resembling the naile of a
man's finger," (Pliny, b. xxxvii. c. 6.)

But the true *onyx* indeed hath verie many veins, and those
of sundrie colours; garnished also it is with circles as white
as milke: and albeit the colours of the veins be inexplicable
as a man casteth his eye upon them severally, yet meeting
as it were all in one, they make a good consort and yeeld a
lustre most pleasing to the sight.

OOZE, v. } The ancient Britons (says Lye,
OOZE, n. } from Baxter) by *asc*, *esc*, *isc*, *osc*,
O'OZY. } and *usc*, (changed into *ax*, *ex*, *ox*,
or *ouse*, and *ux*,) meant *water*, generally; and the
Ger. *Asche*, aqua, præcipue fluens, is by Wachter
called *Vox Celtica*. But Lye also tells us that the
Ouse, indiscriminately written *Ise*, *Ose*, *Use*, is in
A. S. not only called *Usa*, but *Wusa*; which seems
to lead directly to the A. S. *Wes-an*, to wet, *wæsc-*
an, to wash, and *wæc*, water. Tanner's *ouse* is
the bark *wetted* or *washed*, steeped or soaked in
water. *Ooze*, then, is—

(Earth) wetted or washed; (lutum;) mud or
mire; also water or other moisture slowly, slug-
gishly, or gently issuing forth, rising, or springing.
And to *ooze*,—

To issue forth, rise, spring, flow—slowly, slug-
gishly, or gently.

I scapt the deth, I graunt, and brake the bands,
And lurked in a marrice all the nyght
Among the *ooze*, while they did set their sailes
If it so be that they indede so dyd.

Leap madding to the land affrighted from the flood.

Drayton. *Poly-Oibion*, s. 7.

Strange death! for when the thirsty fire had drunk

When the contracted limbs were cramp'd, even then
A waterish humour swell'd and *ooz'd* again.

logy.

unto, unless it be the emerald; India land is the onely
mother of them.—Holland. *Plinie*, b. xxxvii. c. 6.

An *opera* may be allowed to be extravagantly lavish in its
decorations, as its only design is to gratify the senses, and
keep up an indolent attention in the audience.
Spectator, No. 5.

And this [end of XVIth Century] seems the true era
whence the *opera*, or drama, wholly set to musick, and in
which the dialogue was neither sung in measure, nor de-

which amounted not to singing and yet was different from
speech, should be dated.—*Burney. Hist. of Musick, vol. iv.*

How the plastick nature is in general to be conceiv'd,
Aristotle instructs us in these words. If the naupetical art,

operatively and effectually, it would there act just as nature
doth.—*Cudworth. Intellectual System, p. 155.*

The difference between the employment of language in such cases, (in our speculations concerning individuals,) and in our speculations concerning classes or genera, is; that in the former case the use of words is, in a great measure, *optional*; whereas, in the latter, it is essentially necessary.—*Stewart. Apologie*, b. ii. c. 4. s. 3.

It seems not agreeable to what anatomists and *optical* writers deliver, touching the relation of the two eyes to each other.—*Boyle. Works*, vol. i. p. 673.

Nature has wisely placed the *optic* nerve of each eye, not in the middle of the bottom of the eye, but toward the side next the nose; so that whatever part of the image falls upon the *optic* nerve of one eye, may not fall upon the *optic* nerve of the other.—*Ferguson*, vol. i. Lect. 7.

The description of the eye, and of the manner in which the pencils of rays proceeding from the different points of a visible object are collected by the refractive powers of the humours, so as to form a picture on the retina, belongs properly to *opticks*.
Stewart. Outlines of Moral Philosophy, pt. i. s. 2.

It has been proved by *optical* writers, that in perceiving the distances of visible objects from the eye, there is a judgment of the understanding antecedent to the perception.

The former [Demosthenes] who had to deal with a people of much more politeness, learning, and wit, laid the greatest weight of his oratory upon the strength of his arguments offered to their understanding and reason: whereas Tully considered the dispositions of a sincere, more ignorant, and less mercurial nation, by dwelling almost entirely on the pathetick part.—Swift. Yet it is not to be conceiv'd that those eternal effluences of sanctity and love in the glorified saints, should by this means be confin'd, and cloy'd with repetition of that which is prescrib'd, but that our happiness may orb itself into a thousand vagancies of glory and delight, and with a kind of eccentric equation be, as it were, an invariable planet of joy and felicity.

Only there is this difference, that the bodies of the great

O'RGHARD. } Some of our old writers
O'RGHARDING. } (Holland, North) write this word
O'RGHARDIST. } *hort-yard*, (qv.) as if they would
give a Latin origin to the first syllable: the word is
variously written in A. S. *Ort-geard, orc-geard, or-
eard, orc-yrd*. Junius and Lye think the first to be
the most ancient, and that it is formed from *weort-
yard*, i. e. *wyrt-yard*, a yard or place prepared for
worts or herbs; and in *John, c. xviii. l. 1 and 26*,
we find Goth. *Aurtigards, aurtigarda, hortus*, in
A. S. *Wyrt-tun*, an inclosure for *worts*. *Wyrt-gyrd*,
(Somner.) (See TOWN.) Lye would derive the
Lat. *Hortus*, from *ort* or *weort*. Wachter ob-
serves—that *aurt* or *ort* in ancient writings denotes
the same as *wyrt*; and refers to the verb, *ora*,
surgere, oriri, as the root. (See OR, and ORD.)
Orchard is now applied to—

An inclosed plantation of, a yard or garden for,
fruit trees.

To speke wyth him priuelicke, that no man y war nere.

O'RGHESTRA. } Fr. *Orchestre*; It. Sp. and
O'RGHESTRE. } Lat. *Orchestra*; Gr. *Opχη-
στρα*, from *opχασθαι*, saltare, to dance.

That part of the theatre among the Greeks in
which the chorus danced; among the Latins,—in
which the senators sat. See the quotations from
Holiday and Twining.

The modern application of the word may be
traced in the extract from Holiday; unless applied
to musicians in our theatres, in which they really
occupy the seat next the stage, the use of the
word is faulty. It is sometimes written as the
French.

During the stage plaies aforesaid D. Laberivs, a gentleman
of Rome, acted his owne Poem or Enterlude; for which,
being rewarded with 500. thousand sesterces, and a ring of
gold, he passed directly frō the stage by the orchestra, to
take up his place among the Knights in the 14. foremost
seates.—*Holland. Suetonius, p. 242.*

Orchestra (from *opχασθαι*, to dance) was properly the place
where the players usually danced: but here figuratively, it
signifies the seats next the stage. It was the place in the
theatre where the Senators sate at shews, as Vitruvius tells
us, lib. v. cap. 6.—*Holiday. Juvenal, Sat. 3. (28.)*

Devotion, when lukewarm, is undevout;
But when it glows, its heat is struck to Heaven;
To human hearts her golden harps are strung.
High Heaven's orchestra chaunts amen to men.
Young. The Complaint, Night 4.

The performers in the orchestra of a modern theatre, are
little, I believe, aware, that they occupy the place, and may
consider themselves as the lineal descendants of the ancient
Chorus. *Orchestra* (*opχηστρα*) was the name of that part of
the antient theatre which was appropriated to the Chorus.
Twining. Aristotle. Poetics, pt. ii. § 21.

A custom not much differing from these, was practis'd in
this island by our Saxon ancestors upon the same account,

was thus; the person accus'd pass'd blindfold, with bare
feet, over certain plough-shares made red hot, and plac'd at
an equal distance from one another.

The *ordeal* was another established method of trial among

people; and the latter to the nobility.

Secondly, a due *ordering* of our words, that are to proceed
from, and to express our thoughts; which is done by perti-

But it is no harm for him, who is, by right, and in the
greatest propriety, the supreme *orderer* of all things, to *order*
every thing in such a manner as it would be a point of wis-
dom in Him to chuse that they should be *ordered*.
Edwards. On the Freedom of the Will, pt. iv. s. 9.

O'ORDNANCE, or } Fr. *Ordonnance*, gens ou

“Gendarmes des *ordonnances*. The *ordinary* men
of arms of France; first reduced by Charles VII.
(in the year 1444) into certain companies, and
under particular *orders*.” It was indispensable
that these men should have been archers; (Fr.
Artillier;) and in v. ARTILLERY, we have seen that
from them the modern *artillery* took its name, and
by them was conducted; and from these *gens*
d'*ordonnances*, the single word *ordonnance* may
have been applied to the guns now distinguished
by the name of *ordnance*.

Now do they mount their *ordnance* for the day.
Drayton. Battle of Agincourt.

Behold the *ordenance* on their carriages
With fatall mouths gaping on girded Harflew.

Dryden. The Medal.

ORE, n. A. S. *Ora*; Dut. *Oor*, *oore*: Skinner
writes it *oar*, metallum crudum, and supposes it
may be the Fr. *Or*; Lat. *Aurum*, quia *aurum* est
metallum, κατ' ἐξοχήν. Junius,—from Gr. ὄρειν,
to guard with care. *Ore* was also the name of a
coin introduced among the Anglo-Saxons by the
Danes. It is applied to—

Metal unrefined; to—metal generally.

For though that I be olde, foule, and pore,
In' olde for all the metal ne the *ore*,
That under erthe is grave, or lith above,
But if thy wif I were and eke thy love.

With wond'rous art found out the massie *ore*,
Severing each kind, and scum'd the bullion dross.

For besides other minerals, that may be found profitable
to the physician, the drugster, or the mineralist, the *ores* or
wombs of metal themselves, may be divers times found dis-
guised in the form of earth, or of mud, easy to be dried.
Boyle. Works, vol. v. p. 501.

Of gold, indeed, we cannot produce many specimens, yet
sufficient to shew that it is found in this island; but silver
is found in great abundance in our lead *ores*, and veins of
native silver in the copper *ore* of Muckrus, on the lake of
Killarny.—*Pennant. British Zoology, Pref.*

O'READ. Gr. *Ορειας*; a mountain nymph;

This woman was not inspired with the Holy Ghoste, nor
sent from God, (as the Frenshemen beleue) but an enchan-
teresse, an *organe* of the deuill.—*Hall. Hen. VI. an. 9.*

And his brother's name was Jubal, of him came all that
exercyse themselves on ye harpe & on the organs.

Who made the mouth? who th' eye? or who th' ear?
Or who deprives those organs of their use?
Drayton. Moses his Birth and Miracles, b. i.

It is true that in organs there is a confused murmur for a
while, after you have played; but that is but while the bel-

His gentle dumb expression turn'd at length
The eye of Eve to mark his play; he glad

12. Besides the figure and number of *organical* parts in
the brain of a man; how much superior is it, with respect

creature?—*Grew. Cosmo. Sacra, b. i. c. 5.*

Not to give them a quicker sight, as some learned ana-
tomists have thought, for it is the advantageous *organism*
of the eye by which that is procured.—*Id. Ib. b. ii. c. 3.*

In the bodies of animals, the true and proper cause of
motion, or the determination thereof at least; is not the
matter itself *organized*; but the soul either as cogitative, or
plastically-self-active, vitally united thereunto, and naturally
ruling over it.—*Cudworth. Intellectual System, p. 668.*

Whereby it [matter] hath a perfect knowledge of what-
soever it self could do or suffer (though without animal
consciousness) and can form itself to the best advantage,
sometimes improving itself by *organization*, to sense in
brutes, and to reason and reflexive understanding in men.
Id. Ib. p. 687.

But oh! what art can teach,
What human voice can reach,
The sacred organ's praise?
Notes inspiring holy love,
Notes that wing their heavenly ways,
To mend the choirs above.

organist in private, master of the singing boys belonging
thereunto, *organist* of Westminster, and one of his Majesty's
private music.—*Wood. Fasti Oxon. vol. ii.*

A great part of this difference is undoubtedly to be ascribed
to the ideas and feelings which the habitual studies and
amusements of the poet have associated with his *organical*
perceptions.—*Stewart. Of the Human Mind, pt. ii. c. 5. s. 3.*

That, nevertheless, we are not to conclude that every
organized being is informed with such an essence, as to have
an actual principle of motion and perception.

tion from Pliny. But Skinner's explanation of
Gower does not suit Fabyan. Hearne says—that
orped also signifies *courageous*, *stout*, *manly*, or
manfully; and he produces two instances (from
prose additions to R. of Gloucester) of the word
orpedlyche, or *orpedly*; for the latter of which
(he adds) 'tis *manly* in Caxton. *Orpedlice* in
A. S. is interpreted—openly, manifestly, (Lye and
Somner.)

The first spirit quicksilver cleped is;
The second *orpiment*.

Bp. Hall. Ser. Preacht at Westminster, April 5, 1628.

This was the partiality, this degrading of the bishops, a thing wholesome in the state, and *orthodoxal* in the church both ancient and reformed.

Milton. Answer to Eikon Basilike.

Thus many ways it may *orthodoxally* be understood how God or Moses suffer'd such as the demanders were, to divorce for hardness of heart.—*Id. Tetrachordon*.

Athanasius is commonly accounted the very rule of *orthodoxy* in this point.—*Cudworth. Intel. System*, p. 599.

If any question be moved concerning the doctrine of the church of England expressed in the thirty-nine articles, give not the least ear to the movers thereof: that is so soundly and so *orthodoxly* settled, as cannot be questioned without extreme danger to the honour and stability of our religion.

Bacon. Advice to Sir George Villiers.

I confess an *orthodox* faith can never bring us to heaven, without an holy life, but so neither can an holy life do it, without an *orthodox* faith; for heresies are damnable as well as sins, 2 Pet. ii. 1.—*Bp. Beveridge*, vol. ii. Ser. 138.

ORTHOGRAPICAL.

Fr. *Orthographe*; It. *Ortografia*; Sp. *Orthographia*; Lat. *Orthographia*; Gr. *ὀρθογραφία*, from *ὀρθος*, right, and *γραφη*, writing, describing. It is applied to—

Ransake yet we would if we might,
Of this worde the true *ortographie*
The very discent and ethimologie.

The Remedy of Loue. Imputed to Chaucer.

Orthographie, that is to say, the forme and precise rule of writing set down by grammarians, he [Augustus] did not so much observe: but seemeth to follow their opinion rather, who thinke, *Men should write according as they speake*.

Holland. Suetonius, p. 77.

He was wont to speake plain and to the purpose, (like an honest man and a souldier,) and now is he turn'd *orthography* [i. e. *orthographer*,] his words are a very fantastical banquet iust so many strange dishes.

Shakespeare. Much Ado about Nothing, Act ii. sc. 3.

Orthography is that part of grammar which concerns the doctrine of letters, which being the most simple elements of speech, it ought therefore to be so stated, that there may be a sufficient number of them to express all articulate sounds, and not more then are necessary to this end.

Wilkins. Real Character, pt. iii. c. 10.

Orthography, or the erect elevation of the same in face or front, describ'd in measure upon the former idea, where all the horizontal lines are parallels.

OSCILLATE, v.

OSCILLATION.

OSCILLATORY.

Fr. *Osciller*, *oscillation*; Sp. *Oscilacion*; Lat. *Oscillo*, which Vossius and Francis Junius thinks is *obs* and *cillere*, i. e. *move*, to move; nam per aera librati *movebantur*. Applied to—

The motion of a pendulum; motion backward and forward; this way and that; wavering.

The perpetual *oscillations* of this elastic and restless element operate without ceasing on all things that have life, whether animal or vegetable, keeping their fibres, vessels, and fluids in a motion, always changing; as heat, cold, moisture, dryness, and other causes alter the elasticity of the air.—*Berkeley. Siris*, s. 138.

Stimulating substances, taken in diet, increase heat, because they increase the *oscillatory* motion of the solids, but most of all inflammatory spirits.—*Arbuthnot. Aliments*, c. 5.

Move any body, as a pendulum, in one way, and it will continue to *oscillate* in an arch of the same circle, until the known causes make it rest.

Burke. On the Sublime and Beautiful, pt. iv. § 12.

If to please an administration, the Judges can go one way to-day, to please the crowd they can go another to-morrow; if they will *oscillate* backward and forward between power and popularity, it is high time to fix the law in such a manner as to resemble, as it ought, the great Author of all law, in whom there is no variableness nor shadow of turning.

His [God] legal justice cannot be so fickle and so variable, sometimes like a devouring fire, and by and by convivial in the embers, or, if I may so say, *oscitant* and supine.

Milton. Doctrine and Discipline of Divorce, b. ii. c. 3.

We have also shown, that, according to Moses his philosophy, the soul is secure both from death and from sleep after death; which those drowsy noddors over the letter of the Scripture have very *oscitantly* collected, and yet as boldly afterwards maintained, pretending that the contrary is more platonical than Christian or scriptural.

More. The Literal Cabbala, Epis. Ded.

One man's want of leisure is no excuse for the *oscitancy* and ignorance of those who have time to spare.

Locke. Conduct of the Understanding, § 37.

Tatler, No. 63.

Now blame we most the nurlings or the nurse?

Ye shall have of these *osiers* some that are very fine and passing slender, wherof are wrought pretie baskets and many other daintie devises; others also that are more tough and strong, good to make paniers, hampers, and a thousand other necessarie implements for country houses, and to fit the husbandmen.—*Holland. Osteology, Gr. *ὀστέον*, and *λογ-ειν*, to discourse.

Brown (*Christian Morals*) uses *osseous* met.—

"The *osseous* and solid part of goodness."

Osteologists have very well observed, that the parts appertaining to the bones, which stand out at a distance from the bodies, are either the adnate or the enate parts.

Smith. On Old Age, p. 176.

There are three very little bones in the ear, upon whose right constitution depends the due tension of the tympanum; and if the action of one little muscle which serves to draw one of these *ossicles*, fixt to the tympanum, be lost or abated, the tension of that membrane ceasing, sound is hindered from coming into the ear.—*Holder. The bone in these places is kept soft and imperfect in consequence of a more complete and rigid *ossification* being prevented from taking place by the continual motion and rubbing of the surfaces.—*Paley. Natural Theology*, c. 8.

But these complaints, which will be nothing pleasant, no not when perhaps they shall be needfull, banish we must (howsoever we doe) at our first entrance of so weightie a matter: when as we rather should begin (if, as the Poets use, it were our manner also) with good *osses* and luckie forespeakings, with vows and prayers to Gods and Goddesses to vouchsafe their furtherance and happie successe to the enterprize of so great a worke.—*Holland. Marvel. Lachrym. Mus. (1650.)

This distinction of two interior vehicles or tunicles of the soul, besides that outer vestment of the terrestrial body, (styled in Plato το *ὀστρον*, the crustaceous or *ostreaceous* body,) is not a mere figment of the latter Platonists since Christianity, but a tradition derived down from antiquity.

Cudworth. Intellectual System, p. 790.

Every one taking an *ὀστρακον*, or *tile*, carried it to a certain part of the market-place surrounded with wooden rails for that purpose, in which were ten gates appointed for the ten tribes; every one of which entered at a distinct gate. That being done, the archons numbered all the *tyles* in gross; for if there were fewer than six thousand, the *ostracism* was void; then laying every name by itself, they pronounced him, whose name was written by the major part, banished for ten years, enjoying his estate.

Potter. Antiquities of Greece, b. i. c. 25.

The *ostracism*, or ten years' banishment, was not so much intended to punish this or that great man, as to pacify and mitigate the fury of envy, who delights in the disgrace of superior characters, and loses a part of her rancour by their fall.—*Langhorn. Plutarch*, vol. i. *Themistocles*.

O'STRICH. Fr. *Austruche*; It. *Struzzo*; Sp. *Avestruz*; Lat. *Struthio*; Gr. *Στρουθος*, a sparrow: but why the *ostridge* was called *στρουθος*, or *στρουθοκαμηλος*, is not satisfactorily explained. See *Vossius*, in *v. Passer*.

And first to begin with *ostriches*. They are the greatest of all other fowles, and in manner of the nature of four-footed beasts; (namely, those in Affricke and *Aethiopia*.) for higher they bee than a man sitting on horsebacke is from the ground: and as they be taller than the man, so are they swifter on foot than the very horse.

O'TTER. A. S. *Oter*, *otor*, *otter*, *otyr*; Dut. and Ger. *Otter*; Sw. *Utter*, which some derive from the Lat. *Lutra*, the same animal; others from the Gr. ὕδωρ. Ihre observes that Islandic *Udr*, also signifies water, the proper element of this animal. In Fr. it is *Loutre*; It. *Loutra*; Sp. *Lutra*, *nutra*.

As for the *otters*, albeit a kind of beaver they are, yet because I never heard that they came into the salt-water, I make no great reckoning of them.

See the quotation from North.

At the great triumph and entry made, the captain or general that triumpheth as a conqueror did offer the sacrifice, (by the old orders and ancient customs of Rome,) one or divers oxen; whereas at the second triumph called the *ovation*, he only sacrificed a mutton, which the Romans call in their tongue *ovem*, and thereof it was called *ovation*.

North. Plutarch, p. 265.

OUCH. } Mr. Tyrwhitt thinks *nouch* to be
Nouch. } the true word, *ouch* the corruption;
and he cites Du Cange, to show that the Teut. *Nuschin* means *fibula*,—a clasp or buckle; but how it so means, neither he nor Du Cange explain. *Nouche* and *ouche* are, perhaps, both correctly used, as they appear to have the same or very nearly the same meaning; the first, from Fr. *Niche*,—a notch; and the second from the Fr. *Oche*,—also a notch, from *ocher*, *hacher*; to hack, *incidere*, to cut into. Skinner derives *ouched* (*vox facialis*, as he calls it,) from this Fr. verb *Ocher*, *incidere*, *oche*, aena incisura. And thus *ouche*, or *nouches*, (sc. of gold.)

Niches or *notches* of gold (in which the onyx or any other stones were set. See the quotations from the Bible,) or bits of gold *niched* or *notched* in, or inserted in *niches* or *notches*. See the commentary on *Shakespeare. Hen. IV.* pt. ii. Act ii. sc. 4.

O'VEN. Goth. *Auhn*; A. S. *Ofne*; Dut. *Oven*; Ger. *Ofen*; Sw. *Ugn*. Wachter thinks the Goth. *Auhn* or *auchn*, a corrupt pronounciation of *ofn*; and Junius derives *ofn* from the Gr. ἰννος, *furnus*. Tooke thinks the A. S. *Ofne*, and Eng. *Oven*, are the past part. of the A. S. *Heaf-an*, Eng. to *heave*; the regular past tense being A. S. *Haf*, *hof*, Eng. *Hove*, and by the addition of the termination *en* was formed the participle *hafen*, *hofen*, *hoven*, and by the mere omission of the aspirate *afen*, *ofen*, *oven*, and meaning, *heaved*,—raised, or lifted up.

Oven means,—a place, (a fire or furnace,) *heaved* or raised.

And if God clothith thus the hey that to day is in the feeld: and tomorowe is cast into an *ouene*: how myche more you of litil faith!—*Wiclif. Luke*, c. 12.

O'VER, *v.* } In A. S. *Ufa*, *ufera*, *ufemæst*,—
O'VEREST. } are the nouns *altus*, *altior*, *altissimus*: *ufera*, *ofere*, *ofer*, *altior*; *over* or *upper*.
Ufemæst, *altissimus*, *upmost*, *uppermost*, *upperest*, *overest*. In Ger. *Auf*, *auber*, *oben*, *ober*, *oberste*; Dut. *Op*, *opper*, *over*, *opperste*, *overste*; Sw. *Upe*, *up*, *oofwer*, *oofre*, *oofwerste*, *opperst*. Tooke supposes the A. S. *Ufon*, *ufa*, (from the comparative of which our preposition and adjective *over*,) means *top* or *head*, and to be originally derived from the same source as *head*, i. e. the A. S. *Heaf-an*, *heof-an*,—to *heave*, to *lift up*.

Over lip,—the upper lip.

Overest slop,—his uppermost slop.

Over is much used in composition. In some words it is used merely with the same force that it would have if it followed the verb; as to *over-come* us, to *come over* us; to *over-blow*, to *blow over*; to *over-glance*, to *glance over*; to *over-flow*, to *flow over*, *superfluere*; and hence the application when a superfluity or excess is intended; *over* is then equivalent to—*too much*, *more than*, *more than sufficient* or *needful*; and may, when prefixed to adjectives and adverbs, be supplied by the word *too*, (which we do not attach by the hyphen,) as *over-bold*, *too bold*; *over-credulous*, *too credulous*; *over-earnestly*, *too earnestly*, or with an excess of boldness, credulity, earnestness. In these *over* is an adverb and need not be affixed.

In nouns,—*over-greatness*, excessive *greatness*; *over-moisture*, excessive *moisture*;—in these *over* is an adjective and need not be affixed.

In verbs,—to *over-go*, to exceed, to surpass; *over-do*,—do to excess; *over-burden*,—to burden to excess.

It is sometimes used with a *subaudition* of the verb; the storm was *over*; i. e. gone, past *over*. In some words the application is consequential,—as to *over-come*, to *come over*, (sc.) a country, a territory with superior power, and thus,—to subject, to subdue, to conquer; to *over-throw*, as in wrestling, to *throw over*, and thus, to gain the superiority, the victory; to *over-throw*, (sc.) a tower, and consequentially, to destroy. To *over-hear*, to *over-reach*, (met.) to *over-take*, require more particular explanations.

To nothing it is worth *over*, no but to be cast out, and be defouled of men.—*Wiclif. Matthew*, c. 5.

For with ire strogling wel and mightily

Milton. Paradise Lost, b. ii.

See how he lies at random, carelessly diffus'd

OWE, v. } Goth. *Aigan*; A. S. *Agan*, agnian;
OWN, adj. } Ger. *Eigen*; Dut. *Eigenen*; Sw.
OWN, v. } *Ega*; habere, possidere; pro-
UGHT, v. } prium esse vel habere, tenere,
retinere. *Owe* is formed from the A. S. *Ag-an*, by softening the guttural *g* into *w*, *aw*, *owe*. The regular past part. is *owen*, *own*; also *owed*, *owt*, *ought*.

To *owe* is—to possess, or hold, or have, or keep in possession. In Beaum. & Fletch.—“I know not how long I shall owe it;” i. e. keep it, have it; also—to have, keep, with-hold or retain (*de-habere, debere*) what belongs to, is due to, another. In Wiclif, “How much owist thou my lord?”—how much hast thou, holdest or retainest thou, that belongs to, is the property of, is due to my lord, which ought at some time to be delivered or paid to him. “The ower of heaven,” (Bp. Hall,)—the owner, master, ruler.

To *own*,—formed upon the past part. *owen*, and meaning possessed. The carle that owned the good: who had or possessed them, or the property or right to property in them; who claimed or declared them to be his. And hence, to *own* is generally—

To declare, to avow, to profess, to confess, acknowledge.

Ought,—also the preterperfect and past part. of *owe*, and used likewise in the present tense, as a verb formed upon them:—

The one ought five hundred pence; i. e. owed.

The man that ought the dog; i. e. owned.

Neither sones owen to treasure; i. e. ought.

That keep'st me from the house I owe; i. e. own.

Ought, (as now used.) The children ought not to lay up for the fathers: that is, owe it not, it is not their duty; are not bound or obliged, or required by duty on their own part; by right of others. And thus, *ought*,—

To be bound or obliged; to behave or be behoveful; to be needful or necessary.

Own, (contr. *owen*),—Goth. *Aigin*, *aihn*; A. S. *Agen*; Dut. *Eygen*; Ger. *Eigen*; Sw. *Egen*, proprium;

Possessed, (sub.) property,—and hence used substantively,—property; any thing appropriated to, or peculiarly and exclusively belonging to, due to, or the right of. Used adjectively, it is emphatical, as—my child, my own child.

OX. } Goth. *Auhs*; A. S. *Oxa*; Dut.

derives from *avξανεiv*, *augere*, (Ger. *Auchen*, *augere*,
multiplicare, (Wachter;) Goth. *Aukan*; A. S. *Eac-an*,
to eke,) because the *ox*, pater armenti,
increases the herd and the wealth of his owner.
Ihre rather believes from *ok*, a yoke, the *ox* being
animal subjugale. His difficulty is to deduce *juk*,
jug-um, and *auhsn*, *bos*, from the same root; in
the latter word we may suppose the guttural *k*
softened into *g*, and then entirely suppressed. If
Ihre were right, a *bullock* would be a bull *yoked* or
used for the *yoke*. *Yoke* itself is derived by Tooke
from the same A. S. verb *Eac-an*, *ican*, to add, to
join; *ge-ican*, to yoke. *Ox* is not now applied to
the pater armenti, but to the bull after he is in-
capacitated from being so.

P, says B. Jonson, breaketh softly through the lips: it is called by Wilkins a non-spiritous or breathless consonant, of which he calls *F* the incassation, as *V* is of *B*. It is but slightly distinguished in its pronunciation from *B*: the latter requiring a stronger compression of the larynx.

Feeding, having or supplying food or nourishment, nutritious, alimental.

PA'CKET, v.

PA'CKING, n.

Dut. and Ger. *Packen*; Sw.
Packa; Fr. *Empaqueter*, *paquet*;
 Sp. *Paca*, *paquete*.
 Tooke quotes the passages
 given below from Sir T. More,
 and Antony & Cleopatra, and derives the word
Pack from the A. S. *Pacan*, *pæcean*, "To deceive
 by false appearances, imitation, resemblance, sem-
 blance, or representation, to counterfeit; to de-
 lude, to illude; to dissemble, to impose upon:"
 but no simple verb could mean so much intrinsi-
 cally, and it is probable that some verb whence
 the Dut. Ger. and Eng. have descended, existed
 in the A. S.—meaning, as those Dut. Ger. and
 Eng. do, to put together, to bind or fasten up
 together; and that the false appearances which
 caused the deception were effected by the manner

in which the *package* was performed, the shape or
 form, or position, the hue, colour, or complexion,
 thereby given.

To *pack* cards, simply means to put cards toge-
 ther in a *pack*, heap, or bundle; but by gamesters
 they may be put together fraudulently; and
 hence, to *pack* may mean—to defraud, to cheat, to
 impose upon; and a *pack* may be applied to—

Persons combined for purposes of fraud, cheat-
 ing, or imposition; and also to any individual of
 the party. See *PATCH*.

To *pack* off,—elliptically,—to *pack* up the goods,
 and go off or away.

written *pago* or *paco*, which Vossius derives from
the Dor. *Παγ-ω*, quod tum *figere* notat, tum com-

PAD, n. Perhaps (says Skinner) contracted from the Sp. *Pajado*, and this from *paja*; Lat. *Palea*, straw; a *pad* of straw would then be a straw of straw. It is more probably from the A. S. *Pethian*, to *path*; and, consequentially, to tread flat, to flatten. And thus a *pad* is—

PAGE, v. } Fr. *Page*; It. *Paggio*; Sp. *Page*.
PAGE, n. } Skinner and others derive from the Gr. *Pais*, which among the Greeks denoted not only a boy but a servant. Caseneuve,—from *pedagogium*. Boxhornius,—from *bagoes*, an attendant on foot of the king among the Persians and Macedonians. Reland,—from the Turkish *Peck*. Wachter,—from the Sw. *Poike*, a little boy. (See *Menage* and *Wachter*.) Tooke says, that "as servants were contemptuously called *harlot*, *varlet*, *valet*, and *knave*; so they were called *pack*, *patch*, and *page*." He produces the two instances given below, one from *Dives and Pauper*, and the other from *History of Prince Arthur*, to show that the office was not originally one of honour; and derives the word (*page*) from the A. S. *Pac-an*, to *pack*, and, consequentially, to impose upon. See to *PACK*, and *PATCH*.

It is not uncommon also to call a boy—a rogue. And *page* is applied by Chaucer to—

A *boy-child*, a boy or young male servant; a *page* of honour, a boy or youth attendant upon persons of rank.

Our lyege lorde the kyng hath power and fredom of a *page* for to make a yoman, &c.—*Dives & Pauper*. 1st Comm. c. 17.

PA'GEANT, n. } by a small variation of pro-

It is usually applied to—

A representation or exhibition of a showy or splendid kind; to—allegorical representations.

The verb—To exhibit; and (as in Shakespeare) to exhibit in derision or mockery, to mock.

PA'NICK, adj. } See the quotation from
PA'NICK, n. } Potter. In vol. i. c. 17, he
 gives two other reasons for the appellation, and ex-
 plains *panici terrores*, or *panic fears*, to be sudden
 consternations, that seized upon men, without
 any visible cause, and, therefore, were imputed to
 the operation of demons, especially *Pan*, (qv.)
 upon men's fancies.

The first author of it [general shout] was *Pan*, Bacchus's
 Lieutenant-General, in his Indian expedition, where, being
 encompass'd in a valley with an army of enemies, far supe-
 rior to them in number, he advis'd the God to order his
 men in the night to give a general shout, which so surpriz'd
 the opposite army, that they immediately fled from their
 camp; whence it came to pass, that all sudden fears im-
 press'd upon men's spirits without any just reason, were
 call'd by the Greeks and Romans *panick* terrors.
Potter. On Greece, b. iii. c. 8.

But the serpent said unto Adam, Tush, this is but a panick fear in you Adam, you shall not so surely die as you conceit.—*H. More. The Philos. Cabbala*, c. 3.

The panic runs, and into wond'rous shapes

And whistles in his sound.

PA'NTRY. } *Panatiere*, panateria.

A place in which to keep bread; (panis;) and now, any other sort of victuals.

The person who has the care of the bread.
In Sp. *Panadero* is the bread-maker, or baker.

PANTHEISM. } Worship of all the Gods;
PANTHE'ISTIC. } a temple of all the Gods;
PANTHE'ON. } παντων των θεων.

The firste plage is fallen vpon all ydoles and false goddes whiche they had set and packed together in one tempel of pantheon, that is to say, all goddes.—*Udal. Reuelacion*, c. 16.

Pantheism, for instance, and Hobbism, are scandalously bad, scarce differing from the broadest Atheism: and Fatalism, in effect, is but little better.
Waterland. Works, vol. viii. p. 81.

It [the pantheistic system] supposes God and Nature or God and the whole universe, to be one and the same substance, one universal being; insomuch that men's souls are only modifications of the divine substance.—*Id. Ib.* p. 63.

PANTHER. Fr. *Panthere*; It. *Pantera*; Sp. *Pantera*; Lat. *Panthera*; Gr. *Πανθηρ*. Some under the idea expressed by Pliny, think this

animal so called, q. d. παν, all, and θηρ, a beast; because the colours of all beasts may be distinguished in it. Vossius thinks it more probable that the word is Eastern.

The leopard, or spotted panthere expressing the nature and wittes of the Grekis, signifieth the kingdom of great Alexander.—*Joye. Exposition of Daniel*, c. 7.

Wylde beastes in yron yokes he would compell;
The spotted panther and the tusked bore,
The pardale swift. *Spenser. Faerie Queene*, b. i. c. 6.

The panthers and tygres are in a manner the only beasts (that for their variety of spotted skins, and fures which they yeeld) in great request and commendable: for other beasts have each one a proper colour of their owne, according to their kind.—*Holland. Plinie*, b. viii. c. 17.

PANTOFLE. } Fr. *Pantoufle*; It. *Pantufola*,
PA'NTABLE. } a shoe or slipper. Some ety-

mologists determine upon a Greek origin, and devise the compound παντοφελος, παν, omne, and φελος, suber, a cork, or from πατειν, calcare, and φελος, because (says Skinner) they were formerly made of cork, on account of its lightness. And see Menage. Wachter contends for a northern origin. In Swed. and Ger. Toffel, without any prefixed word, has the same application, and is derived by Wachter from the Lat. Tabula. Schilter supposes pan to be bain, (i. e. bone,) applied to the foot; and thus, that the word means tabula pedis; the thing itself being used merely for the tread of the foot. With the addition of an upper covering, it is equivalent to—
A slipper.

It was there as free to sinne not onelie without all punishment, but also without any man's marking, as it is free in the citie of London, to chose without all blame whether a man lust to weare shoo, or pantocle.

PA'NTOMIME, n. } Fr. *Pantomime*; It. *Pan-*
PA'NTOMIME, adj. } tomimo; Sp. *Pantomimo*;
Lat. *Pantomimus*; Gr. *Παντομιμος*, απο του παντα μιμεισθαι, because they mimicked, or imitated, or expressed, by correspondent action, every thing they intended to represent.

Bacon writes with the Latin termination.

There be certain pantomimi, that will represent the voices of players of interludes, so to life, as if you see them not, you would think they were those players themselves.
Bacon. Naturall Historie, s. 240.

The pantomimes, who maintained their reputation from the Age of Augustus to the sixth century, expressed, without the use of words, the various fables of the gods and heroes of antiquity; and the perfection of their art which sometimes disarmed the gravity of the philosopher, always excited the applause and wonder of the people.
Gibbon. Roman Empire, c. 31.

Pantomimic gesture was amongst the Romans one way of exhibiting a dramatic story.

Possibly it may not be amiss to offer new ones [words and names] when the old are apt to lead men into mistakes as this of *paternal* power probably has done, which seems so to place the power of *parents* over their children wholly in the father, as if the mother had no share in it, whereas, if we consult reason or revelation, we shall find, she hath an equal title. This may give one reason to ask, whether this might not be called more properly *parental* power.

That a man's nature is *passible*, is its best advantage; for
by it we are all redeemed; by the *passiveness* and sufferings
of our Lord and brother we were all rescued from the portion
of devils; and by our suffering we have a capacity of serving
God beyond that of angels.—*Bp. Taylor, vol. ii. Ser. 10.*

in such his violent, exorbitant, tyrannicall proceedings.
Prynne. Treachery & Disloyalty, pt. iii. p. 5.

Such a tempered matter as this is analogous to the animal
spirits in man, which, if matter could be the soul, were the
very soul of the body, and common percipient of all motions
from within or without, by reason of the tenuity, *passivity*,
and near homogeneity, and (it may be) imperceptibility of
any change or alteration from the playing together of its own
tenuous and light particles.
More. The Immortality of the Soul, b. ii. c. 2.

passivity.—*Bp. Taylor, vol. iii. Ser. 10.*

In infants there is nothing that can resist God's spirit,

men can doe in disposing themselves are but approaches,
and similitudes.—*Id. Liberty of Prophecyng, § 18.*

It is a very common expression, that such a one is very

indulgence imaginable.—*Spectator, No. 438.*

We should account him not many degrees removed from

The greater part degenerate from their kind.—*Id. Ib.*

If we know any thing of matter, we know, that by itself
it is a lifeless thing, inert and *passive* only; and acts neces-

gravitation. This *passiveness* seems to be essential to it.
Wollaston. Religion of Nature, § 9.

Body cannot be actually infinite in its quantity or extent,
its *passivity* or inertia cannot be infinite, but lessens as its

of *improbus*. The glossarist says, that among the

covetous; and Ray, in his North Country Words,
interprets it—*witty, subtle*. Mr. Steevens says,
peevish, in ancient language, signifies—*foolish,*
silly, weak. In Junius it is suggested that *pevers*,
by the omission of the canine letter *r* in each syl-

peevish. The early usages of the word do not
confirm this etymology. For modern usage, see
the quotation from *Spectator*.

PELTING. *Pelting*, as used by Gardner and
others, seems (says Steevens) to be the same as
paltry; and since Gab. Harvey, in a letter to
Spenser, writes *pauling*. Subsequent etymologies
decide *pauling* to be the proper way of writing
the word, and *paltry*, the undoubted original; nay,
farther, that *paltry* is from the Su.-Goth. *Paltor*,
rags, or the Teut. *Palt*, a scrap; but why these
latter words have this application no attempt is
made to explain. *Paltry*, (qv.) must be left to
the fate assigned it by Tooke, and *pelting* to the
"seems" of Steevens, unless we may suppose it to
be *peltring* (the *r* omitted), and applied to things
as common and worthless as the refuse of a pelt
or skin-yard. See PELT.

Now popishe pelting traditions florished and gilte with the
name of the church, and folkes must believe them as much

— I *perceiue* these lords

At this encounter doe so much admire,
That they deuoure their reason and scarce thinke
Their eies doe offices of truth.

Shakespeare. Tempest, Act v. sc. 1.

His particular end in every man is by the infliction of
pain, damage, and disgrace, that the senses and common
perceivance might carry this message to the soul within,
that it is neither easeful, profitable, nor praise-worthy in this
life to do evil.—*Milton. Reason of Church Govern.* b. ii. c. 3.

Their necessary shifts have long enured them to cloak the
defects of their unstudied years, and hatred now to learn,
under the appearance of a grave solidity, which estimation
they have gain'd, among weak *perceivers*.—*Id. Tetrachordon*.

Jupiter made all things, and all things whatsoever exist
are the works of Jupiter; rivers, and earth, and sea, and
heaven, and what are between these, and gods, and men,
and all animals, whatsoever is *perceivable* either by sense
or by the mind.

Cudworth. Intellectual System, b. i. c. 4. p. 446.

Nay, the very essence of truth here, is this clear *percep-*
tibility or intelligibility.—*Id. Ib.* p. 718.

To this truth Mr. Hobbs sets his seal with all willingness
imaginable, or rather eagerness, as also his followers, they
stoutly contending that we have not the *perception* of any

thing but the phantasms of material objects, and of sensible
words or marks, which we make to stand for such and such
objects.—*More. Immortality of the Soul*, b. ii. c. 1.

There is nothing in the world more constantly varying,
than the ideas of the mind. They do not remain precisely
in the same state for the least *perceivable* space of time.

Edwards. On the Freedom of the Will, pt. ii. s. 6.

That the soul is the sole *perceptient*, which alone hath
animadversion and sense, properly so called, and that the
body is only the receiver and conveyer of corporeall impres-
sions, is as certain, as philosophy can make it.

Glanvill. Vanity of Dogmatizing, c. 4.

Whether the change that is made in a man's mind in
regeneration, be always perform'd so *perceptibly* that the
man himself shall be able to give a particular account both
of the time when, and of the manner how it was wrought in
him?—*Sharp*, vol. iii. Ser. 13.

The power of *perception*, is that we call the understanding:
perception, which we make the act of the understanding,
is three sorts: 1. The *perception* of ideas in our own minds.
2. The *perception* of the signification of signs. 3. The *per-*
ception of the agreement or disagreement of any distinct
ideas: all these are attributed to the understanding, or *per-*
ceptive power, though it be to the two latter that, in strictness
of speech, the act of understanding is usually applied.

Locke. Hum. Underst. b. ii. c. 21. s. 5.

— Thus immense

They [theories] all evidently proceed on a supposition,
suggested by the phenomena of physics, that there must of
necessity exist some medium of communication between
the objects of *perception* and the *perceptient* mind.

Stewart. Philosophy of the Mind, c. 1. s. 1.

A tree is matter and an oyster is matter, and both of them
are living matter, yet the matter of the tree is different from
that of the oyster; the matter of the tree being only (as is
generally supposed) living matter, whilst that of the oyster
is not only living but *perceptient* matter; *perceptivity*, then,
however it may be produced, is that which constitutes an
essential difference between an oyster and a tree.

Anecdotes of Bp. Watson, vol. i. p. 26.

I have considered during every period of my life, pain as
a positive evil which every *perceptient* being must be desirous
of escaping: but death is a door of entrance unto a better
life, which may, by a sincere christian, be considered as a
blessing.—*Id. Ib.* vol. i. p. 143.

We know, that it is still possible to possess another sense,
that of sight, which shall disclose to the *perceptient* a new
world.—*Paley. Natural Theology*, c. 23.

CONCUSSION.

To shake through; to strike against, so as to

It is, therefore, the strength of the *percussion*, that is a
principal cause of the loudness or softness of sounds: as
knocking harder or softer; winding of a horn stronger or
weaker; ringing of a hand-bell harder or softer, &c. And
the strength of this *percussion* consisteth as much, or more,
in the hardness of the body *percussed*, as in the force of the
body *percussing*.—*Bacon. Naturall Historie*, § 163.

Nay, some have beene so curious as to note that the times
when the stroke or *percussion* of an envious eye doth most
hurt, are, when the party envied is beheld in glory or
triumph.—*Id. Ess. Of Envie*.

Where the air is the *percutient*, pent or not pent, against

He handles the questions very *perplexedly* which yet is very easily resolved upon the grounds already laid.

Bp. Bull. Works, vol. iii. p. 1085.

This question (after an intimation of the uncertainty and *perplexedness* of all human events; but withal, of the exactness of the providence of God, who hath made every thing beautiful in its season) he thus resolves in the words of the text, "I know, (saith he) there is no good in them, but for a man to rejoice and to do good in his life."

Sharp, vol. i. Ser. 3.

The Indians, Persians, Goths, and Egyptians philosophise, and firmly believe the immortality of the soul, and future recompenses, which before the greatest philosophers had denied, or doubted of, or *perplexed* with their disputes.

Why, therefore, may it not be supposed to ferment the earth, and to constitute that fine penetrating principle which introduces and assimilates to food of plants, and is so fugitive as to escape all the filtrations and *perquisitions* of the most nice observers?—*Berkeley. Siris, s. 127.*

And when the first of the *pirry* and blast is past, we shall haue the winde sodainly a new blow cold again.

Id. Ib. vol. iii. p. 83.

To follow; to follow diligently; to follow, (*sc.*) with pains and penalties; to follow or *pursue* (with enmity); to persist in following or *pursuing*; to tease, harass, distress, or punish by so doing.

High on the bank the deep-mouth'd hound appears;
Still opening, following still, where'er he steers,
The *persecuted* creature to and fro,
Turns here and there, to 'scape his Umbrian foe.

Dryden. Virgil. Æneis, b. xii.

The gospel frequently declares that the true disciples of Christ must suffer *persecution*; but that the church of Christ should *persecute* others, and force others by fire and sword, to embrace her faith and doctrine, I could never yet find in any of the books of the New Testament.

Locke. A Letter concerning Toleration.

Persecution produces no sincere conviction, nor any real change of opinion; on the contrary, it vitiates the public morals by driving men to prevarication, and commonly ends in a general though secret infidelity, by imposing, under the name of revealed religion, systems of doctrine, which men cannot believe and dare not examine: finally, it disgraces the character, and wounds the reputation of Christianity itself, by making it the author of oppression, cruelty, and bloodshed.—*Paley. Moral Philosophy, b. iv. c. 10.*

Milton. Paradise Regained, b. i.

God has promised and engaged to mankind, that whosoever shall faithfully and constantly *persevere* in the duties of a pious christian life, shall obtain an eternal crown of glory, and an inheritance that fadeth not away.

South, vol. iv. Ser. 12.

As for Christ's coming into the world to save sinners, it was not to save the elect, but under conditions of repentance and *perseuerant* faith; and no decree of reprobation excludeth any man from salvation provided he always repent and believe.—*Whitby. Five Points, c. 2. s. 2. Diss. 4.*

For this organical hypothesis seems directly contrary to the whole tenour of the gospel, promising eternal and everlasting life to those who believe in Christ, and *perseueringly* obey him.—*Cudworth. Intellectual System, p. 568.*

Would those, who, by opinion plac'd on high,
Stand fair and perfect in the Country's eye,
Maintain that honour, let me in their ear

Shakespeare. 2 Pt. Hen. IV. Act ii. sc. 2.

— Which are indeed nought else

But the protractiue trials of great Ioue,
To find *persistent* constancie in men?

Id. Troyl. & Cres. Act i. sc. 3.

The love of God better can consist with the indeliberate commissions of many sins, than with an allowed *persistence* in any one.—*Government of the Tongue.*

iv. Another usual concomitant of infidelity, is its obstinacy, and pertinacious *persisting* in error. This likewise was the temper of the Jews, not to be convinced by any evidence that could be offered to them. When our Saviour had several times put them to silence, so that they were not able to answer him, yet they obstinately *persisted* in their former conceit, and stiffly held the conclusion, though they were not able to make good the premises. Matt. xxii.

Tillotson, vol. iii. Ser. 191.

PERSOLVE, v. Lat. *Per-solvere*, to pay thoroughly, wholly, completely.

it is said, the name was first so given to the mask;
to the wearer of it, the player, or actor; to the character acted; to any assumed character or station; to any character or station; to any one

having or holding any character or station. Martinius gives from an ancient vocabulary, *per se una*. Vossius records other conjectures. *Person*, in English, seems applied to express,—

The individuality of a human being; individual, animate existence; individual character or station; bodily or corporeal form or substance. See the quotation from Locke.

To *personify*,—(see IMPERSONATE),—to ascribe to, to describe as having, to invest with, to assume, to wear, the qualities or attributes of an animate being—with the bodily or corporal substance of a living creature.

To *personate* was the old verb.

While also ghe helpen in preier for us, that of the *personnes* of manye facis of that ghyuyng that is in us, thankyngs be doon for us bi manye men to God.

Wiclif. 2 Cor. c. 1.

Milton. *Paradise Lost*, b. x.

It was not gold as to my charge thou lay'st,

That wrought with me: thou knowst the magistrates

Massinger. *The Great Duke of Florence*, Act iv. sc. 2.

Prynne. *Histrion-Mastix*, pt. i. Act iii. sc. 3.

Wherefore, this beeing one of the strangest examples of a *personation*, that euer was in elder or later times; it deserueth to bee discouered, and related at the full.

Bacon. *Hen. VII.* p. 113.

This it is hath made the most royall princes and greatest *persons* (who are commonly the *personators* of these actions) not only studious of riches, and magnificence in the outward celebration, or shew, (which rightly becomes them) but curious, after the most high, and hearty inventions, to furnish the inward parts.—B. Jonson. *Masques. Hymenæi*.

[Expressing besides] a most real affection in the *personators*, to those, for whose sake they would sustaine these *persons*.—Id. *Masque at Lord Haddington's Marriage*.

This being premis'd to find wherein *personal* identity consists, we must consider what *person* stands for; which, I think, is a thinking intelligent being, that has reason and

reflection, and can consider itself as itself, the same thinking thing in different times and places; which it does only by that consciousness which is inseparable from thinking, and as it seems to me essential to it: it being impossible for any one to perceive without perceiving that he does perceive.

Locke. *Hum. Underst.* b. ii. c. 27.

A plurality of *persons* or *personal* subsistences in the diuine nature, is a great mystery, and so to be acknowledged by all who really are and profess themselves Christians.

South, vol. iv. Ser. 7.

But what do *personal* reflections concern the cause of religion. Whatever it may be to the reputation of an opinion, I am sure it is nothing to the truth of it that such or such a man holds it.—Sharp, vol. i. Ser. 1.

[How shall these poor short faculties measure] that unutterable incomprehensible mystery of two natures, united into one *person*, and again of one and the same nature diffused into a triple *personality*!—Id. vol. iii. Ser. 1.

As the belief of our present existence necessarily accompanies every act of consciousness, so from a comparison of the sensations and thoughts of which we are now conscious, with those of which we recollect to have been conscious formerly, we are impressed with an irresistible conviction of our *personal* identity.—Stewart. *Philos. Essays*, pt. i. c. 1.

Now that which can contrive, which can design, must be a *person*. These capacities constitute *personality*, for they imply consciousness of thought.

Paley. *Natural Theology*, c. 23.

There is yet another topic, which he has been no less studious to avoid, which is *personality*; and though he professes to give occasional delineations of living manners and not to make men in his closet (as some essayists have done) he does not mean to point at individuals.

Observer, No. 86.

Our courts now regard a man's *personality* in a light nearly if not quite equal to his reality: and have adopted a more enlarged and less technical mode of considering the one than the other.—Blackstone. *Commentaries*, b. ii. c. 24.

PERU'WIG, v. } *ruqua*, capillamentum. Wach-
ter derives from the Gr. *Περρικός*, yellow; because
the Romans made their *perukes* of the yellow hair
of the Germans; and the ingenuity of this ety-

it does not appear that the Romans imposed this
Greek name upon an ornament formed of German
materials. Vossius, (*De Vitiis*, lib. ii. c. 15,) gives
the Low Lat. *Perruqua*, but no instance of its use.
The attempts to trace it to a northern origin are
equally unsatisfactory.

Phantasm, or *phantom*,—an apparition, a vision,
(sc.) of some one dead or absent; a spectre; a
ghost; a mere imagination; a creation of the
fancy.

For those that we inuent by oure wyttes are none other
but false and deceivable visers whereby God is *phantasyed*.

They have set all their heartes and *phantasies* in such a
wise upon their goods, that they cannot suffer any body to
occupy their goods, nor they themselves use it not.
Latimer, Ser. 7. On the Lord's Prayer.

Wonder it is to see how the Frenchmen juggle with this
phantasticall lawe (Salique) folowyng the crafty hasarders
whiche vse a plai called—seest thou me or seest thou me

Such false *phantasticall* fayners were at that tyme much
regarded and no less beloued in Fraunce.
Grafton. Hen. VI. an. 10.

Who wondrous things concerning our welfare,
And straunge *phantomes* doth lett us ofte foreseee,
And ofte of secret ills bids us beware.—*Id. Ib. b. ii. c. 12.*

According to them, the devil that is so often spoken of in
the Scriptures, is nothing else but either a disease of the
body, or a *phantasm* in the brain, or the wicked principles
and inclinations of a man's heart.—*Sharp, vol. iii. Ser. 4.*

Yet the making of those things themselves therefore to
be so many persons and gods, was nothing but poetick fiction
and *phantasty*.—*Cudworth. Intellectual System, p. 531.*

To a *phantom* of the brain whom he would paint valliant
and cholerick he has given the name of Achilles.
Pope. View of Epic Poetry, s. 1.

Ambitious *phantasms* haunt his idle brain,
And pride still prompts him to be greatly vain.
Brooke. Jerusalem Delivered, b. i.

Like the French republic it [the Italian republic] is in

vanish to-morrow.—*Eustace. Italy, vol. i. c. 2.*

PHARE. Fr. *Phare*; It. *Farò*; Sp. *Farol*;
Gr. *Φαρος*. (See the quotation from Pliny.) Ap-
plied to—

A watch-tower; a beacon, lighthouse, or light.

A great name there is of a tower built by one of the Kings
of Egypt within the island *Pharos*, and it keepeth and com-
maundeth the haven of Alexandria, which tower (they say)
cost eight hundred talents the building.

PHARMACY. Fr. *Pharmacie*; It. and Sp.
Farmacia; Gr. *φάρμακον*, from *φάρμασσειν*, *medi-
cari*, hoc est *mederi*, (Vossius.)

The knowledge of medicines, and their use; the
art of preparing and mixing them.

And *fermacies* of herbs, and eke save
Thy drunken, for they wold hire lives have.

PHASE. Gr. *Φασις*, from *φαιν-εσθαι*, to appear.
Used in the plural to express the *appearances*
of the planetary bodies.

At such times as these planets show their full *phases* they
are found to be spherical, and only lose this figure by virtue
of position to the sun to whom they owe their light.

Derham. Astro-Theology, b. v. c. 1.

Should note the *phases* of the fickle moon.

Grainger. The Sugar Cane, b. i.

PHE'ASANT. Fr. *Faisan*; It. *Fagiano*; Sp.

from *Phasis*, a river of Colchis, at the mouth of
which these birds were said to be found in great
numbers.

Drayton. Poly-Olbion, s. 24.

O friend which passest by, here lie we wretched *phears*,
Withouten honour of the grave, without lamenting tears.
North. Plutarch, p. 320.

PHEEZE, v. The commentators on the *Taming*
of the *Shrew* produce various instances of the use
of this word. Sir T. Smith says,—to *feize* means,
in fila deducere; Stanyhurst translates, Italis
longè disjungimur oris, "We are touz'd and from
Italy *feaz'd*." Fuller says,—“But Bishop Tur-
berville recovered some lost lands, which Bishop
Voysey had *vezed*, and particularly obtained of
Queen Mary the restitution of the fair manor of
Crediton;” and in the margin he explains, *vezed*,
“driven away, in the dialect of the West,” (*Wor-
thies of Dorsetshire, i. 312. Nichol's edition.*)

Skinner says,—that *fease*, or *feag*, is to lash, to
beat with rods; and derives from Ger. *Fegen*, to
sweep, to cleanse, or from *ficken*, to rub. It may
have descended from the French verb *faire*, more
immediately from the participle *faisible, feasible*, or
that may be done; and hence mean,—

To do, to do away, to do for; to give a good
beating or drubbing.

She for awhile was well sore *affesed*.

Browne. Shepheard's Pipe, Ecl. 1.

Ile *pheeze* you in faith.

Id. Merry Wiues of Windsor, Act i. sc. 3.

PHE'NIX. Gr. *Φοινίξ*; Lat. *Phenix*. (See
the quotations from Pliny.) It is applied (met.)
to any thing of extreme rarity and excellence.
See the quotation from Latimer.

For God's love let him not be a *phenix*, let him not be
alone, let him not be an hermit closed in a wall; some good
man follow him, and do as he giveth the example.

Latimer, Ser. 1. Before King Edward.

But the *phænix* of Arabia passeth all others. Howbeit, I
cannot tell what to make of him; and first of all, whether it
be a tale or no, that there is never but one of them in the
whole world, and the same not commonly seen. By report

he is as big as an eagle: for colour, as yellow and bright as gold; (namely, all about the neck;) the rest of the bodie a deepe red purple: the taile azure blue, intermingled with feathers among, of rose carnation colour: and the head bravely adorned with a crest and pennache finely wrought, having a tuft and plume thereupon, right faire and goodly to be sene.—*Holland. Plinie, b. x. c. 2.*

The bird *phœnix* is supposed to have taken that name of this date tree, (called in Greek *φοινίξ*;) for it was assured unto me that the said bird died with the tree, and revived of itself as the tree sprung again.—*Id. Ib. b. xiii. c. 4.*

All these receive their birth from other things;
But from himself the *phœnix* only springs;
Self-born, begotten by the parent flame
In which he burn'd, another and the same.
Dryden. Ovid. Metam. b. xv.

PHENOMENON, or } Gr. *φαινόμενον*, (past
PHENOMENON. } part. of *φαίνω*, to ap-
pear,) that which has appeared, (sc.) to any of
the senses.

Any appearance; sensible object.

But I'll not move beyond our selves, and the most ordi-
nary and trivial *phænomena* in nature, in which we shall
finde enough to shame confidence and unplume dogmatizing.
Glanvill. The Vanity of Dogmatizing, c. 2.

But how pitifull and ridiculous are the grounds upon
which such men pretend to account for the very lowest and
commonest *phænomena* of nature, without recurring to a
God and Providence!—*South, vol. iv. Ser. 9.*

But the atheist that puffs at this and lays it wholly aside,
what does he resolve the *phænomena* of nature into?
Id. vol. ix. Ser. 3.

Among the various *phenomena* which the human mind
presents to our view, there is none more calculated to excite
our curiosity and our wonder, than the communication
which is carried on between the sentient, thinking, and
active principle within us, and the material objects with
which we are surrounded.—*Stewart. Human Mind, c. l. s. l.*

PHIAL, *n.* } Also written *Vial*, as in the
PHIALLED } quotation from Shakespeare. Fr.
Phiole; It. *Fiala*; Lat. *Phiala*; Gr. *φιάλη*, *poculum*,
patera, *phiala*. A *φίειν*, *cui vicinum φυειν*,
fund-ere, to pour.
A small bottle.

Take thou this *violl* being then in bed,
And this distilling liquor drinke thou off.
Shakespeare. Romeo & Juliet, Act iv. sc. 1.

— Come, *viall*!
What if this mixture do not worke at all?
Shall I be married then to-morrow morning?
No, no, this shall forbid it. *Id. Ib. Act iv. sc. 3.*

Full on my fencelless head its *phial'd* wrath,
My fate exhaust; and for my happiest hour
Exalt the vengeance I prepare for thee!
Shenstone. Love & Honour.

PHILANTHROPY. } Gr. *φιλανθρωπία*, (from
PHILANTHRO'PICK. } *φιλεῖν*, to love, and
PHILANTHROPIST. } *άνθρωπος*, man,) a lov-
ing of men, says Minshew.

A love of men or mankind; benevolence to-
wards mankind.

They thought themselves not much concerned to acquire
that God-like excellency, a *philanthropy* and love to all
mankind.—*Bp. Taylor, vol. iii. Ser. 1.*

The simplicity and purity of the spirit, and the *philan-
thropy* of God, will not admit that there should in one single
proposition be many intricate meanings, or that his sense
should not certainly be understood, or that the people be
abused by equivocal and doubtful senses.

Id. vol. iii. Ser. 11.

This *philanthropy* (which we have not a proper word in
English to express) is every where manifest in our author,
and from hence proceeded that divine rule which he gave
to Scipio, that whensoever he went abroad he should take
care not to return to his own house, before he had acquired
a friend by some new obligation.

Dryden. The Character of Polybius.

Commonly also it [God's goodness] is by the most obliging
and endearing name stiled love and *philanthropy*, intimating
the earnest regard and benevolence God had to us his crea-
tures.—*Barrow, vol. ii. Ser. 27.*

— O how omnipotence
Is lost in love! Thou great *Philanthropist*!
Father of angels, but the friend of man.

Young. The Complaint, Night 4.

Our vices are of a more tame and gentle kind than those
of the ancient heathen world: they are disarmed of much of
their malignity, by the general influence of a spirit of *philan-
thropy*, which, if it be not the same thing in principle with
christian charity, (and it may indeed be different,) it is cer-
tainly nearly allied to it, and makes a considerable part of it

in practice. The effect of this *philanthropic* spirit is, that
the vices which are still generally harboured are sins of in-
dulgence and refinement rather than of cruelty and barba-
rism. crimes of thoughtless gaiety rather than of direct
premeditated malice.—*Bp. Horsley, vol. iii. Ser. 40.*

PHILAUTY. Gr. *φιλαντία*, (*φιλ-ειν*, *αυτον*,
to love self.) Love of one's self. Self-liking,
(Minshew.)

Incourag'd thus: the dangerous quintessence
Of venturous everswelling *philauty*,
Of discontent, of scorn, of insolence,
Of tow'ring fancies, and self-flattery,
And of the stoutest heav'n-aspiring pride
Together in one desperate plot he ty'd.
Beaumont. Psyche, c. 7. s. 269.

Here we see *philautie* or self-love, which rageth in men
so preposterously, that even natural dutie and affection
[are] quite forgotten.—*Holinshed. Hen. II. an. 1173.*

PHILIPPICK. } Lat. *Philippica*, so called
PHILIPPIZE. } from certain orations of De-
mosthenes against *Philip* of Macedon.

— I'de write lines as ill,
Rather then thee, divine *philippick*, hold
Though fam'd, which art, after the first, unroul'd.
Holyday. Juvenal, Sat. 10.

I rather would be *Mævi*us, thrash for rhymes
Like his, the scorn and scandal of the times,
Than that *philippick* fatally divine,
Which is inscrib'd the second, should be mine.
Dryden. Juvenal, Sat. 10.

With the best intentions in the world he naturally *philip-
pizes*, and chaunts his prophetic song in exact unison with
their designs.—*Burke. On the French Revolution.*

PHILLYSING. A word formed for the oc-
casion.

He pass'd his easy hours, instead of pray'r,
In madrigals, and *phillysing* the fair.

Not to weary my reader nor myself with over much *philo-

verse is this, that Adam is here condemned to a mortal,
flitting, and impermanent state, till he reach his æthereal
or pure fiery vehicle.

More. Defence of the Philosophic Cabbala, c. 3.

It would come still more home to the purpose if the con-

sent for, and averred the truth thereof to *Tiberius Cæsar*,
could be thought authentick.

Id. Immortality of the Soul, b. iii. c. 17.

And this mixture of *philology*, throughout the whole, may

Udall. Luke, Pref.

In *philosophy*, the contemplations of man do either pene-
trate unto God or are circumferred to nature, or are reflected
or reverted upon himself. Out of which several inquiries
there do arise three knowledges, divine *philosophy*, natural
philosophy, and human *philosophy*, or humanity.
Bacon. Of the Advancement of Learning, b. ii.

Aristotle and Theophrastus, with the Peripateticks, in
manner all, divide *philosophy* in this manner; namely, into
contemplative and active. For necessary it is (say they)
that a man (to attain unto perfection) should be a spectator
of all things that are, and an actor of such things as be
seemly and decent.—*Holland. Plutarch, p. 659.*

Gray. Rome, April, 1740. Let. 18.

Picturesque properly means what is done in the style and with the spirit of a painter; and it was thus, if I am not much mistaken, that the word was commonly employed, when it was first adopted in England.

PIDDLE. Either (says Skinner) from the It. *Piccolo*, small, or the verb to *peddle*; or the Fr. *Petite*, petty.

Piddle, n. is the name of a river which discharges itself into the sea at Pool, formerly "en-stilled Trent:" it seems (from Drayton) to have received its name from the small assistant brooks which flow into it.

To *piddle*, in the examples below, is—
To busy or employ, or to be busy or employed about, to attend to trifling matters; to act or deal in a small way.

Piddling,—minute, trifling, frivolous.

You cunninge archers very often put yourselves unto [some cost] beinge verie Englishmen, never ceasing *piddling* about theyr bowe and shaftes, when they be well.

Walpole. Anecdotes of Painting, vol. ii. c. 1.

PIE. "The *pie* is a table or rule in the old Roman offices, shewing in a technical way, how to find out the service which is to be read upon each day," (Steevens.) What was called *The Pie*, by the Clergy before the Reformation, was called by the Greeks *Πι-vaξ*, or the index; (lit. a plank; met. a painted table or picture;) and because indexes or tables of books were formed into square figures resembling pictures or painters' tables, hung up in a frame, these likewise were called *Πι-vaξes*, or being marked only with the first letter of the word, *πi's* or *pies*, (Ridley.)

It is the familiar English name for the Romish *Pica*, Ordinal or Service Book.

Fox. Martyrs, p. 1211.

The number and hardness of the rules called the *pie*, and the manifold changings of the service, was the cause, that to turn this book only was so hard and intricate a matter, that many times there was more business to find out what should be read, than to read it when it was found out.

Solomon doth chiefly intend in the words of the text, the
free and comfortable enjoyment of the good things of this
life that God hath blessed us with, in opposition to a *pinching*
and penurious way of living.—Sharp, vol. ii. Ser. 3.

It is certainly much more advisable to give liberally and
largely, and plentifully, even as much as our condition in
this world, and the necessities of our families can allow,
though by so doing we shall prove to have given in greater
abundance than we were strictly obliged to, than by giving
stingily and *pinchingly*, now and then a little pocket-money
or so, to run the hazard of being transgressors of the com-
mandment, and having our portion among the covetous and
unmerciful.—*Id.* vol. i. Ser. 7.

With *pincers* next the stubborn steel he strains,
Yet fixt it stands and mocks his utmost pains.

You may wonder, sir, (for this seems a little too extrava-
gant and *pindarical* for prose,) what I mean by all this
preface.—Cowley. *Ess. The Garden*.

The character of these late *Pindarics*, is a bundle of
rambling, incoherent thoughts, expressed in a like parcel of
irregular stanzas, which also consist of such another com-
plication of disproportioned, uncertain, and perplexed verses
and rhymes.—Congreve. *Discourse on the Pindaric Ode*.

There is nothing more frequent among us, than a sort of
poems entitled *Pindaric Odes*, pretending to be written in
imitation of the manner and style of *Pindar*, and yet I do
not know that there is to this day extant, in our language,
one ode contrived after his model.—*Id.* *Ib.*

becoming both our veneration and admiration of the in-

Godliness or goodness, righteousness; religious-
ness, regard or reverence for God or religious
duties; for our duties as created beings, towards
God; as children, to our parents and brethren.
In our older writers it is sometimes written *piety*,
when used as we now use *pity*, and *pity* where
we now use *piety*. See the quotation from Hol-
land's *Suetonius*.

Where I haue liu'd at honest freedome, payed

Our whole duty is made up but of three things: that a

respect to his neighbour; and piously with respect to God.
Sharp, vol. i. Ser. 15.

It has been the frequent lamentation of good men, that
verse has been too little applied to the purposes of worship,
and many attempts have been made to animate devotion to
pious poetry. Contemplative piety, or the intercourse between
God and the human soul, cannot be poetical.

PIP

PIP, n. Dut. *Pippe*; Ger. *Pips*; Fr. *Pépie*;
It. *Pipita*; Sp. *Pepita*, and also *Petela*, which
induces Menage to believe *Pipita* to be a cor-
ruption of the Lat. *Pituita*. Palladius describes
the *pituita* in fowls to be a disease which covers
the tip of the tongue with a white pellicle. Mar-
tinus gives *pipita*.

The verb to *pip* or *peep*, (qv.) Lat. *Pip-are*,
formed from the sound; and the disease is pro-
bably so named because fowls, when suffering it,
frequently emit a similar sound.

Lat. *Placeta*; Gr. *πλατεις*, broad, wide. Our word *place* is used by metaphysical writers as equivalent to the Gr. *τοπος*. (See the quotation from Plutarch, and those from Locke and Boyle.) In common usage,—

A point, a part or portion of space, (implying, generally, an occupier.)

A *place*, (sc.) of existence,—a station or situation, rank or order.

A *place* of abode or dwelling,—a dwelling, residence, seat, mansion.

A *place* in motion or progression,—precedence or priority; height or elevation.

To *place*,—to put or move into a *place*; to put, to set, to lay, to station.

To give *place*,—to give, to concede, to yield, (sc. *place* or station.)

To take *place*,—to take precedence or superiority of *place* or station; to precede; to be preferred.

To take *place*, (sc. in being or existence,)—to be, or happen to be.

Drayton. Legend of Pierce Gaveston.

The Stoics, and Epicurus do hold, that there is a difference betweene voidnesse, *place*, and room: (*κενοι, τοπον, χωραν*;) for voidnesse (say they) is the solitude or vacuity of a body: *place*, (*τον δε τοπον*) that which is fully occupied and taken up with a body: but roome or space, that which is occupied but in part; as we may see in a rundlet or barrell of wine.—*Holland. Plutarch*, p. 668.

As in simple space we consider the relation of distance between any two bodies, or points; so in our idea of *place*, we consider the relation of distance betwixt any thing, and any two or more points, which are considered as keeping the same distance one with another, and so considered as at rest.—*Locke. Of Hum. Underst.* b. ii. c. 13. s. 7.

Though it be true, that the word *place* has sometimes a more confused sense, and stands for that space, which any body takes up, and so the universe is in a *place*.

Place likewise is taken sometimes for that portion of infinite space, which is possessed by and comprehended within the material world; and is thereby distinguished from the rest of expansion; though this may more properly be called extension, than *place*.—*Id. Ib.* b. ii. c. 15. s. 6.

The generality of philosophers, after Aristotle, conceive *place* to be the immoveable and immediately contiguous concave surface of the ambient body, so that it is a kind of vessel, that every way contains the body lodged in it, but with this difference, that a vessel is a kind of moveable *place*, as when a bottle of wine is carried from the celler to the table; but *place* is an immoveable vessel, or a vessel considered as immoveable.—*Boyle. Most of the peculiar words and phrases that either I, or

this matter, make use of, are borrowed from the judicious
and elegant contriver of them, the profound restorer and
refiner of almost extinct *Platonism*.

The *Platonists* denied the great doctrine of the *peripatetics*
that all the objects of human understanding enter at first
by the senses; and maintained, that there exist eternal and
immutable ideas, which were prior to the objects of sense,
and about which all science was employed.

If they be well considered they will convince any reason-
able man, that how *plausibly* soever this objection looks at
the first sight, yet there is nothing in the world in it, but it

Covetousness is apt to insinuate also by the *plausibility*
of its pleas.—*South*, vol. iv. Ser. 10.

[If these things be so] then may it with some degree of
plausibleness be suggested, that the prophecies are nothing
more than enthusiastic imaginations.

Clarke. On the Evidences, Prop. 14.

As Clarke, in common with his antagonist, regarded the

PLAY, *v.* } A. S. *Pleg-an*, to jest, to sport;

PLA'YFUL. } or,—
PLA'YSOME. } To keep working or at work;

to keep in action, exercise, or practice; to exer-
cise, to practise, to perform.

To *play* or *ply*, (an engine,)—to work or labour,
keep it at work.

To *play*, (an instrument of music,)—to work it,
to perform upon it, and, consequently, bring forth
its powers, either by the touch or breath; to
produce its music.

To *play*, (a game at cards, cricket, dice, &c.)—
to work, labour, employ, or keep employed, busy
or busied; and hence, to *play*, is to game or to
gamble.

And as to *play* a musical instrument, or to *play*
games, is in lieu or in relief of more serious occu-
pation, to *play* is,—

To amuse, to sport, to frolic, to trifle; to do
any thing sportively, frolicksomely, triflingly,
gaily, merrily, jestingly; to keep in sportive, light,
or sprightly action or motion.

Play is much used in composition.

uncommon.

South, vol. vi. Ser. 10.

To say that, even in this science, the ideas of extension,

POCK. } Dut. *Pocke*; Ger. *Pock*; A.S.

POCK-HOLE. } from the Lat. *Pustula*, a blister.
Wachter, among other conjectures, thinks that,
velut *expulsiones naturæ*, the Ger. *Pock*, may be
from the verb *Pocken*, pulsare, to beat; (to *poke*;) and
Tooke is of opinion—that *pock* is so applied
as we use it; because, where the pustules have
been, the face is usually marked, as if it had been
picked or *pecked*. This accounts for one disease,
the small *pocks* or *pox*; and the other may have
received its name from the similarity of the pus-
tules. The Fr. *Picote*, or small *pox*, is derived
by *Menage* from the verb *Piquer*.

See the quotation from Beaumont and Fletcher,
in v. *Pit*, for an example of the plural, *pocks*.

Than was God able to helpe no disease, but ymages were

Spenser. Faerie Queene, b. iii. c. 12

Every wicked man is a traitor to his king: yea, every of

POD. Skinner derives from the Dut. *Bode*,
domuncula, a small house or abode. *Ped* (Moor,
Suffolk Words) is a basket, a panier; it occurs
in Ray, and is used by V. K. the Glossarist to
Spenser's *Shepherd's Calender*, (Nares.) *Pod*,
Moor likewise says—is the belly or paunch. Both
ped and *pod* are found in Tusser, (*Husbandry
Furniture*, s. 5, 6.) and, though applied by him to
different articles, each seems to signify a some-
thing which is to hold or contain other things;
and in this they agree with the *pod* of peas,
beans, &c. and all have, probably, a common
origin.

That which holds or contains, (the seed,) the

When the weather is very hot, you should cover the
glasses with mats in the heat of the day, to screen them
from the violence of the sun, which is then too great for
them, causing their leaves to flag, and their blossoms to
fall off without producing *pods*.
Miller. Gardener's Dictionary. Pisum.

The *pods*, [of the cocoa,] which seldom contain less than
thirty nuts, of the size of a flatted olive, grow upon the

POETRY. } Modern writers (see espe-
cially the quotations from Elyot, Bacon, B. Jonson,

and Temple) consider making, creating, inventing, i. e. invention, not verse-making, as the characteristic of *poetry*.

For in him we lyuen and mouen and ben, as also sum of ghour *poetis* seiden.—*Wiclif. Dedis*, c. 17.

For in him we liue, moue, and haue oure beyng, as certayne of your owne *poetes* sayd.—*Bible*, 1551. *Ib.*

And grete well Chaucer, when ye mete
As my disciple and my *poete*.—*Gower. Con. A.* b. viii.

A *poesie* is picture lyke,

Drant. Horace. The Arte of Poetry.

Semblably they that make verses, expressynge therby none other lernynge, but the crafte of versifieng, be not of auncient writers named *poetes*, but only called versifiers.
Sir T. Elyot. The Governour, b. i. c. 13.

And *poetry* was the first philosophy that euer was knowen, wherby men from theyr chyldhode were brought to the reason, how to liue wel, lernynge therby not onely maners and naturall affections, but also the wonderful workes of nature, myxtyng serious mater with thynges that were pleasaunt.—*Id. Ib.*

Antiquitie is to be pardoned in this behalfe, namely, in joyning together matters historically and poetically, to make the beginnings of cities to seeme more honourable.
Hackluyt. Voyages, vol. i. p. 221.

Or if I would delight my private hours
With music or with *poem*, where so soon
As in our native language can I find
That solace.
Milton. Paradise Regained, b. iv.

Poesy is his [the *Poet's*] skill or craft of making; the very fiction itself, the reason or form of the work. And these three voices differ, as the thing done, the doing, and the doer; the thing feigned, the feigning and the feigner; to the *poem*, the *poesy*, and the *poet*.—*B. Jonson. Discoveries*.

Because the acts or events of true history have not that magnitude, which satisfieth the mind of man, *poesy* feigneth acts and events greater and more historical; because true history propoundeth the successes and issues of actions not so agreeable to the merits of virtue and vice, therefore *poesy* feigns them more just in retribution, and more according to revealed providence; because true history representeth actions and events more ordinary, and less interchanged; therefore *poesy* endueth them with more rareness, and more unexpected and alternative variations: so it appeareth that *poesy* serveth and conferreth to magnanimity, morality, and to delectation.—*Bacon. Of Learning*, b. ii.

Simonides said that picture was a dumb *poesie*, and *poesie* a speaking picture.—*Holland. Plutarch*, p. 805.

A *poet* is that which by the Greeks is called κατ' εἶδον, ὁ ποιητής, a maker, or a feigner: his art, an art of imitation or of feigning, expressing the life of man in fit measure, numbers, and harmony according to Aristotle: from the word ποιεῖν, which signifies to make, or feign.
B. Jonson. Discoveries.

While pedant *poetasters* of this age,

Loose humours vent, and ballad-lines extrude,
Which grieve the wise, captiue the multitude.
Beaumont. To the Memory of Sir John Beaumont.

The famous *poetess* Corinna five times had the advantage of Pindarus the *poet*, who in the city of Thebes had publicly challenged her to contend in the poetical art.

But about the originall of *poemes* and *poëtrie*, there is a great question among authors. And it is probably gathered by histories, that there were *poets* before the time of the Trojan warre.—*Holland. Plinie*, b. vii. c. 56.

Poems, like pictures, are of different sorts,
Some better at a distance, others near,
Some love the dark, some choose the clearest light,
And boldly challenge the most piercing eye;
Some please for once, some will for ever please.
Roscommon. Horace. Art of Poetry.

But no authority of gods nor men
Allow of any mean in *poesy*. *Id. Ib.*

The names given to *poets*, both in Greek and Latin, express the same opinion of them in those nations; the Greek signifying makers or creators, such as raise admirable frames and fabrics out of nothing, which strike with wonder and with pleasure the eyes and imaginations of those who behold them. The Latin makes the same word common to *poets* and to prophets.—*Sir W. Temple. Of Poetry.*

A *poetaster*, in his raging fit,
(Follow'd and pointed at by fools and boys,)
Is dreaded and proscib'd by men of sense.
Roscommon. Horace. The Arte of Poetry.

The critics have concluded that it is not necessary the manners of the hero should be virtuous. They are *poetically* good if they are of a piece.—*Dryden. Virgil. Æneis*, Ded.

What mourner ever felt *poetic* fires!
Slow comes the verse that real woe inspires:
Grief unaffected suits but ill with art,
Or flowing numbers with a bleeding heart.
Tickell. On the Death of Mr. Addison.

After all this, it is surely superfluous to answer the question that has once been asked, Whether Pope was a *poet*? otherwise than by asking in return, If Pope be not a *poet*, where is *poetry* to be found?—*Johnson. Life of Pope.*

Poetical expression includes sound as well as meaning. "Music," says Dryden, "is inarticulate *poetry*;" among the excellencies of Pope, therefore, must be mentioned, the melody of his metre.—*Id. Ib.*

1 *Mad.* Then th' art a fool; for my eldest son had a *poll-foot*, crooked legs, &c.—*Dekkar. The Honest Whore, sc. 12.*

You [*Vulcan*] come a little too tardie; but wee remit that to your *poll-foot*; we know you are lame. *B. Jonson. Love's Welcome.*

One maimed in the thumb, or who has maimed his thumb, (*sc.*) to avoid military service; (an offence so common as to occasion severe laws against it;) hence, a coward, a dastard, a mean-spirited fellow.

Suche a proude *poltroune*. *Skelton. Duke of Albany and the Scottes.*

The cause of God and the faith of Christ, of which we are seriously such champions, is dishonoured and renounced by our faithless, apostate, atheistical actions, by our hellish oaths and imprecations (that *poltron* sin, that second part of Egyptian plague of frogs and lice, and locusts.) *Hammond. Works, vol. iv. p. 521.*

—There's no cowardize,
No *poltrounerie*, like urging why? wherefore?
But carry a challenge, die, and do the thing. *B. Jonson. The Magnetick Lady, Act iii. sc. 5.*

The part of a man of fashion is to sin bravely: to regard the natural bashfulness attending the breach of God's commandments, as the ill-bred shame of the rustic, and repentance as a kind of *poltrounerie* in which his honour and reputation suffer.—*Warburton. Works, vol. x. Ser. 22.*

Yet he [*Aristotle*] absolutely denied *Πολυκρανιαν*, and *πολυαρχιαν*, a *polyarchy* or mundane aristocracy, that is, a multiplicity of first principles and independent deities. *Cudworth. Intellectual System, p. 411.*

However, though Plato acknowledged and worshipped many Gods, yet is it undeniably evident, that he was no *polyarchist*, but a monarchist, an assessor of one supreme God.—*Id. Ib. p. 403.*

POLYCHÆRANY. Gr. *Πολυκρανιη*; *πο-*
λυς, many, and *κρανος*, a chief.
A government of many chiefs or princes.

And what do you think of this lawlesse *polycoranie*? That every parish minister and his eldership should be a bishop and his consistory. *Bp. Hall. Episcopacy by Divine Right, s. 6.*

Otherwise there would not be *εἰς Κρανος*; one prince or monarch over the whole; but the world would be a *polychæran* or aristocracy of Gods, concluded to be an ill government.—*Cudworth. Intellectual System, p. 411.*

I will leave it to such as are to claim after the issue of Henry the VIIth., to lay in bar the *polygamy* of Charles Brandon, the Duke of Suffolk. *Burnet. Records, vol. i. pt. ii. No. 30.*

And the example of David, a man after God's own heart, so great a prophet, and type of Christ, and yet so great a *polygamist*.—*Hammond. Works, vol. i. p. 592.*

Polygamy was not commonly tolerated in Greece, for marriage was thought to be a conjunction of one man with one woman; whence some will have *γαμος* derived, *παρὰ το δυο ἀμα εἶναι*, from two becoming one. *Potter. Antiquities of Greece, b. iv. c. 11.*

Had God intended *polygamy* for the species, it is probable he would have begun with it; especially as, by giving to Adam more wives than one, the multiplication of the human race would have proceeded with a quicker progress.

Paley. Moral Philosophy, b. iii. c. 6.

POLYMATHY. } Gr. Πολυμαθεια, πολυς, POLYMATHIST. } and μαθειν, to learn.

Learning in many things; much or various learning.

Which yet ought not to be thought any derogation from this eminent philologer, [Vossius,] whose *polymathy* and multifarious learning is readily acknowledged by us.

Cudworth. Intellectual System, p. 498.

These may be termed learned men, and the more behoveful for the subsistence of a country than those *polymathists* that stand poring all day in a corner upon a moth-eaten author, and converse only with dead men.

POLYNOMY. } Gr. Πολυνωμια, multitudo POLYNOMOUS. } *nominum*, from πολυς, and ονομα, a name.

A multitude, a variety of names.

In which there is no account at all given of the many Pagan, poetical, and political Gods, what they were; which is so great a part of our performance to prove them really to have been but the *polyonymy* of one God.

Cudworth. Intellectual System, To the Reader.

Their polytheism or multiplicity of Gods [was] nothing but the *polyonymy* of one God, or his being called by many personal proper names.—*Id. Ib.* p. 503.

The supreme God amongst the Pagans was *polyonymous*, and worshipped under several personal names, according to several notions and considerations of him, from his several attributes and powers, manifestations and effects in the world.—*Id. Ib.* p. 477.

See POLYPODE.

I cannot overpasse but record the reports of Trebius Niger, one of the train and retinue of L. POLYSYLLABLE. Fr. *Polisyllable*; Lat. *Polysyllable*; Gr. Πολυσυλλαβος, having many syllables. See SYLLABLE, DISSYLLABLE, &c.

Mr. H. seems to be mistaken, in supposing that monosyllables and dissyllables precede *polysyllables*.

Beddoes. On Mathematical Evidence, p. 11. Note.

POLYTHEISM. } Gr. Πολυθεια, multitudo POLYTHEIST. } *deorum*: πολυς, many, and POLYTHERISTICAL. } *θεος*, a God. A multitude of gods.

For since it is impossible that any man in his wits should believe a multiplicity of Gods according to that idea of God before declared, that is, a multiplicity of supreme, omnipotent, or infinitely powerful beings; it is certain that the pagan *polytheism*, and multiplicity of Gods, must be understood according to some other notion of the word Gods, or some equivocation in the use of it.

Cudworth. Intellectual System, p. 209.

[He] so manages this mighty and universal hatred of *polytheism*, to the rejection of a trinity of divine coequal persons, as is noways consistent with the unity of the divine essence.—*South*, vol. v. Ser. 3.

Now that Orpheus, the Orphick doctrine, and poems were *polytheistical*, is a thing acknowledged by all.—*Id. Ib.* p. 298.

To any one who considers justly of the matter, it will appear, that the Gods of all *polytheists*, are no better than the elves or fairies of our ancestors, and merit as little any pious worship or veneration.

Hallywell. Melampr. (1681) p. 70

The reason why men are so short and weak in governing is because most things fall out to them accidentally, and come not into any compliance with their preconceived ends, but they are forced to comply subsequently, and to strike in with things as they fall out, by *postliminious*, after-applications of them to their purposes, or by framing their purposes to them.—*South, vol. i. Ser. 8.*

POT-GUN. *Pot-gun* and *pop-gun* have been confounded. It is evident, from Hackluyt's *Artillerie of the Turkes*, that the former was a gun of a very different description from the latter. It may have been so called from the shape or the size of the hollow. Hackluyt further says—that these *pot-guns* were charged with "bullets of brasse or copper, full of wild-fire, and that when they were in the aire they flamed forth, and on falling on the ground they brake, and the fire came out, and did some harm."

The handguns shot was innumerable and incredible; also there were twelve *potgunnes* of brasse that shoot upward, whereof eight were set behind the church of S. Cosme and Damian, and two at Saint John de la Fontaine toward the port of Italy, and the other two afore the gate of Auvergne, the which were shot night and day: and there were three sorts of them, whereof the greatest were of sixe or seven spannes about.—*Hackluyt. Apothecarii were generally those who kept *apothecas* seu *bothegas*; and subsequently restricted to those who kept shops or depositories for drugs, &c. See *Du Cange*.

There can be no doubt that *apothecary* and *pothecary* are the same word; whether the omission of the initial *a* was originally made in the latter here or abroad.

And forth he goth, no lenger would he tary,

If *pouerte* be consistent with the highest degree of God's love and favour, we may bear it contentedly; and if there be reason for contentment even in *pouerte*, to be discontented in any condition that is above it, is shamefull and intolerable.—*Tillotson*, vol. iii. Ser. 136.

In the prospect of *pouerte*, there is nothing but gloom and melancholy; the mind and the body suffer together; its miseries bring no alleviations; it is a state in which every virtue is obscured, and in which no conduct can avoid reproach; a state in which cheerfulness is insensibility; and dejection sullenness; of which the hardships are without honour, and the labours without reward.—*Rambler*, No. 53.

POUR, *v.* } Minshew derives from Dut.
POURING, *n.* } *Bor-en*, to tilt, (a vessel.) Skinner,
—either from the sound of falling water, or

from the Lat. *Purus*. In some parts of England
the influx of the tide, the rush of it, is called the
bore; (see BORE;) and in Scotland, "an opening
in the clouds, when the sky is thick and gloomy,
or during rain, is called the blue *bore*," (Jamieson.)
The word *bore*, in each of these usages, may be
traced to the A. S. *Bor-ian*, to bore, to pierce;
and, consequently, to make an opening. To
pour (by the change of *p* into *b*) may be the same
word, and applied thus,—

To throw or cast forth water from an opening,
a hole, in large quantities, not as rain in drops,
but in a stream, as if from a waterspout; to throw,
cast, send forth, in a stream, in large quantities,
in great numbers; to emit, to utter in a continued
course or current, or constant succession.

And others that do admit of these things, *preconceptions* from education, that the soul when she departs this life is suddenly either twitched up into the *cælum empyreum*, or hurried down headlong towards the centre of the earth, makes the apparitions of the ghosts of men altogether incredible to them.—*More. Immortality of the Soul, b. ii. c. 16.*

Upon these two so different *preconceived* opinions, it will, and must certainly follow, that those of the latter judgment cannot but feel that horror and remorse of mind upon the doing of these actions, which those of the contrary persuasion, to wit, that they are no sins, undoubtedly, upon the very same actions, do not feel.—*South, vol. iv. Ser. 5.*

Such being the froward disposition of *prejudicated* persons, that let the truth be never so evident, the arguments, the authorities against them never so convincing, yet they will quite reject and *precondemne* them, ere they have once examined them.—*Prynne. Histrio-Mastix*, Epist. Ded.

Who not conceiting it as it was told,

If after all his profession he cannot bear any opposition to his opinion, if he cannot so much as give a patient hearing, much less examine and weigh the arguments on the other side, does he not plainly confess it is *prejudice* governs him?—*Locke. Conduct of Understanding*, s. 10.

Observe here, that this rule of casting away all our former *prejudicate* opinions and sentiments is not proposed to any of us to be practised at once, considered as men of business or religion, as friends or neighbours, as fathers or sons, as magistrates, subjects, or christians; but merely as philosophers and searchers after truth.—*Watts. Logic*, pt. ii. c. 4.

I persuade me that whatever faultiness was but superficial to *prelaty* at the beginning, is now by the just judgment of God, long since branded and inworn into the very essence thereof.—*Id. The Reason of Church Government*, b. ii. c. 1.

It was a confounding argument against presbytery, that those *prelates*, who are most suspected to lean that way, treated their inferior brethren with haughtiness, rigour, and contempt.—*Swift. A Preface to the Bp. of Sarum*.

When by length of time the custom of making elections by the clergy only was fully established, the popes began to except to the usual method of granting these investitures, which was *per annulam et baculum*, by the prince delivering to the *prelate* a ring, and pastoral staff or crosier: pretending, that this was an encroachment on the church's authority, and an attempt by these symbols to confer a spiritual jurisdiction.—*Blackstone. Commentaries*, b. i. c. 2.

Waterland. Works, vol. i. p. 252.

affected by the same tendency to a *premature* generalization.
Stewart. Philos. Essays. Prel. Dissert. c. 1.

Sometimes, in consequence of a peculiar disposition of
mind, or of an infirm bodily constitution, a child is led to
seek amusement from books, and to lose a relish for those
recreations which are suited to his age. In such instances,
the ordinary progress of the intellectual powers is *pre-*
maturely quickened.—*Id. Of the Human Mind, c. 6. s. 7.*

of God, yet he never compared himself to God his Father."
Waterland. Works, vol. i. p. 10.

For the farther illustration of which, we must *promise*
this, as a certain and fundamental truth, that so far as
service imports duty and subjection, all created beings, men

They who have not so far look'd into those forms, are not
sure by virtue of syllogism, that the conclusion certainly
follows from the *premises*; they only take it to be so by an
implicit faith in their teachers, and a confidence in those
forms of argumentation; but this is still but believing, not
being certain.—*Locke. Hum. Underst. b. iv. c. 17. s. 4.*

call to mind. See MONSTER.

To show or exhibit before or precedently; to
present previously to the senses, to the mind; to
portend, to foreshow.

Neither in the delivery of these things, though evidently
true, do we presuppose any thing, as if we would gain men's
affections by stealth or flattery, but we *premonstrate* rather,
that is, we deduce one thing out of another continually,
from the first principles of metaphysicks until we come to
the last and least differences of things.
Hartlib. Reform of Schools, p. 51.

If such demonstration was made for the beginning, then

PRENSATION. Lat. *Prensatio*, from *prensare*, (*prehensare*), to catch hold of, to seize. Seizing, catching hold of.

That commonly by ambitious *prensations*, by simoniacal corruptions, by political bandyings, by popular factions, by all kinds of sinister ways, men crept into the place, doth appear by those many dismal schisms, which gave the church many pretended heads, but not one certain one.

Shakespeare. *Othello*, Act iii. sc. 3.

The kings of these realms enjoy several powers, wherein the laws have not interposed; so they can make war and peace without the consent of parliament, and this is a great prerogative: but, if the parliament doth not approve of the war, the king must bear the charge of it out of his own purse; and this is a great check on the crown. So the king hath a prerogative to coin money without consent of parliament; but he cannot compel the subject to take that money, except it be sterling gold or silver, because herein he is limited by law.—*Swift. To the People of Ireland*, Let. 4.

Prætorian, or *prætorial*, is sometimes used generally—as equivalent to *judicial*. See example from Bacon in v. *Cautelous*.

When he [Trajan] ordeined anie *prætor*, giuing to him the sword, he would bid him vse the sword against his enemies in iust causes; and if he him selfe did otherwise than iustice, to vse then his power against him also.
Fox. Martyrs, p. 35. an. 100.

[Vatinius] came very arrogantly one day unto Cicero, being in his *prætoriall* seat, and asked him a thing which Cicero would not grant him there, but would think of it at better leisure.—*North. Plutarch, p. 714.*

He ordeined a standing camp at Rome, wherein the *prætorian* cohorts wandering up and downe before that time, and dispersed in diuerse innes and hostelries, might be received.—*Holland. Suetonius, p. 105.*

He was no sooner returned from the wars, but he would needs prove the people's good wills unto him, and procured his name to be billed among them that sued for the *prætorship* of the city, (that is to say) the office of the ordinary judge that ministreth justice unto the citizens.
North. Plutarch, p. 388.

The authority of his command over the guards, which was but moderate before his time, he extended, by gathering into one camp all the *prætorian* cohorts then dispersed over the city.—*Gordon. Tacitus, vol. i. b. iv.*

These assertions, however defective in reason, became unanswerable, when the fierce *prætorians* increased their weight, by throwing, like the barbarian conqueror of Rome, their swords into the scale.
Gibbon. Roman Empire, vol. i. c. 5.

PRETTY. } Dut. *Prat, practigh*; Ger.

PRETTINESS. } etymologists appear to suspect
 an affinity between *pretty* and *proud*; but the common source, the A. S. *Prut-ian*, superbire, seems to have escaped them. *Prut*, superbus, differently written, is "*præte*, ornatus, excultus, adorned, decked, tricked; hence, perhaps, (adds Somner,) our *pretty*, id est bellus, scitus, concin-nus." The application may be traced thus:—

Decked, adorned, or ornamented, to a pleasing degree, or in a pleasing manner; and, thus, having a pleasing degree or kind of beauty.

The word is often used in contempt; and as distinguished from a defined certainty or full sufficiency; expressing merely, a degree that may satisfy.

And though thou seest a faut right at thine eye,
 Excuse it blue, and glose it *pretily*.
Chaucer. The Court of Loue.

And now the practique boy did so approve him,
 And with such grace and cunning arte did mooue him,
 That all the *pritty* Loves and all the Graces love him.
Spenser. Brittain's Ida, c. 4.

 The things we know are neither rich nor rare,
 But wonder how the devil they got there.
Pope. Prologue to the Satires.

And trust me, dear! good-humour can prevail,

 Beauties in vain their *pretty* eyes may roll;

Waterland. Works, vol. ii. p. 372.

How *prevailent* the prayers of good men are with God appears from this, that when God is absolutely resolved not to have mercy upon a people, he expresseth his unalterable purpose to this effect, that though his chiefest favourites, such as Noah, and Daniel, and Job, should intercede with him on behalf of that people, yet their prayers should do them no good, as you have it four times repeated in the xivth chap. of Ezekiel.—*Sharp, vol. iv. Mr. Chubb himself, p. 317, speaks of motives as the ground and reason of action. By influence, and by *prevailing* influence.—*Edwards. On the Will, pt. ii. s. 10.*

The former tells us that *varicare* is interpreted by Nonus—*distortis cruribus*; and by Festus—*incurva crura habentes*, with distorted legs, or having bandy legs. See the quotations from Pliny and Kennett.

To move crookedly, out of a straight line; to move or go diversely or perversely; to evade or escape the direct course; "to swerve or digress from truth and honesty," (Cotgrave.) To act or speak evasively or indirectly.

When any of us hath *prevaricated* our part of the covenant, we must return to that state, and redeem the inter-medial time spent in sin by our doubled industry in the ways of grace.—Bp. Taylor, vol. ii. Ser. 5.

The ploughman, unlesse he bend and stoupe forward with his bodie must needs make slight worke, and leave much undone as it ought to be; a fault which in Latine we call *prevarication*: and this tearme appropriate unto husbandrie, is borrowed from thence by lawyers, and translated by them into their courts and halls of pleas: if it be then a reprochfull crime for lawyers to abuse their clients by way of collusion, we ought to take heed how wee deceive and mocke the ground where this fault was first found and discovered.

Holland. *Plinie*, b. xviii. c. 19.

But on holi-dayes men every where runne to the alehouse, to playes, to enterludes, and dances, to the very derision of God's name, and the *prevarication* of the day.

Id. vol. iv. Ser. 4.

There lay an action of *prevarication*, when the accuser instead of urging the crime home, seemed rather to hide or extenuate the guilt. Hence the Civilians define a *prevaricator* to be one that betrays his cause to the adversary and turns on the criminal's side, whom he ought to prosecute.
